Create user in fusion and assign roles

-create a user:

→ Navigation → tools → security console

→user → add user account

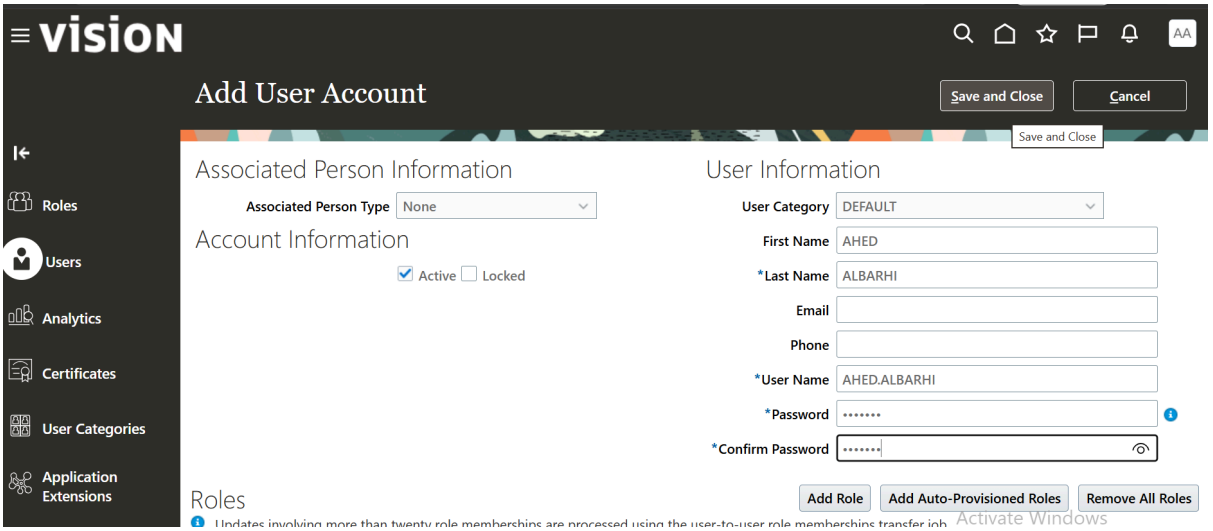

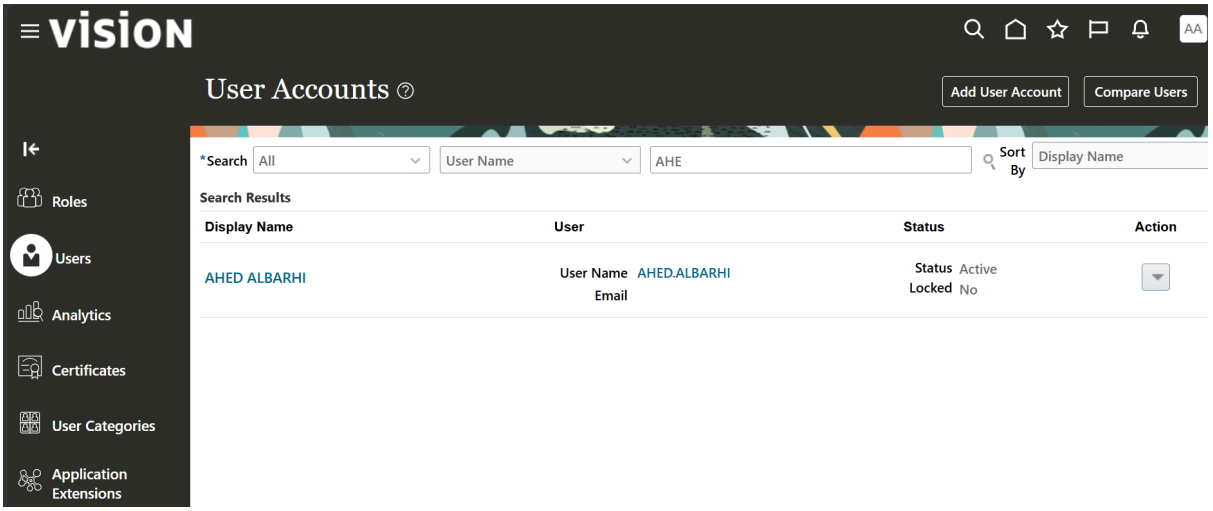

Username: AHED.ALBARHI

Pass: AHED_welcome123

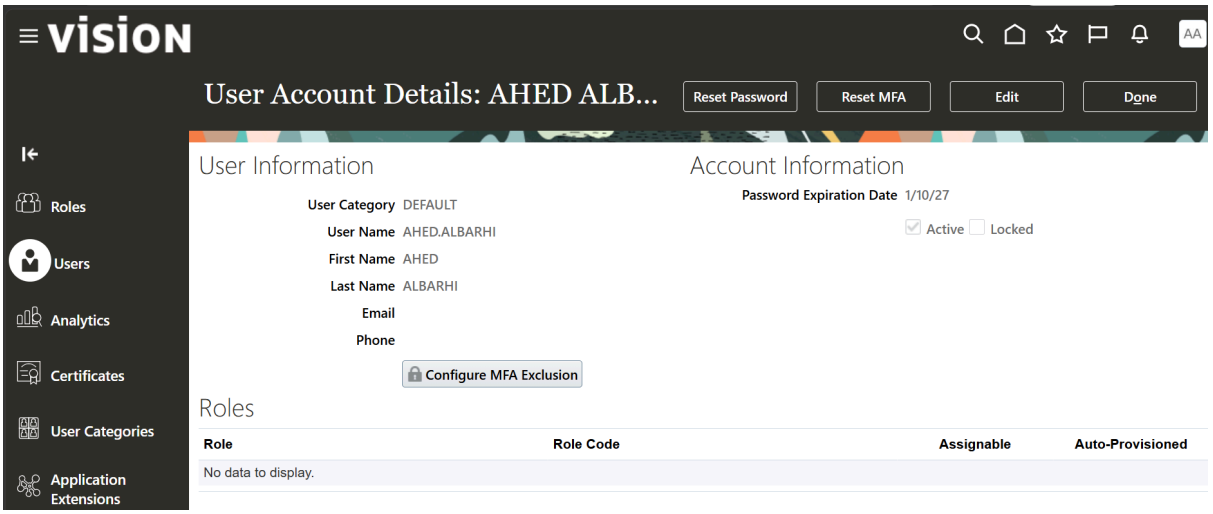

→ click save and close

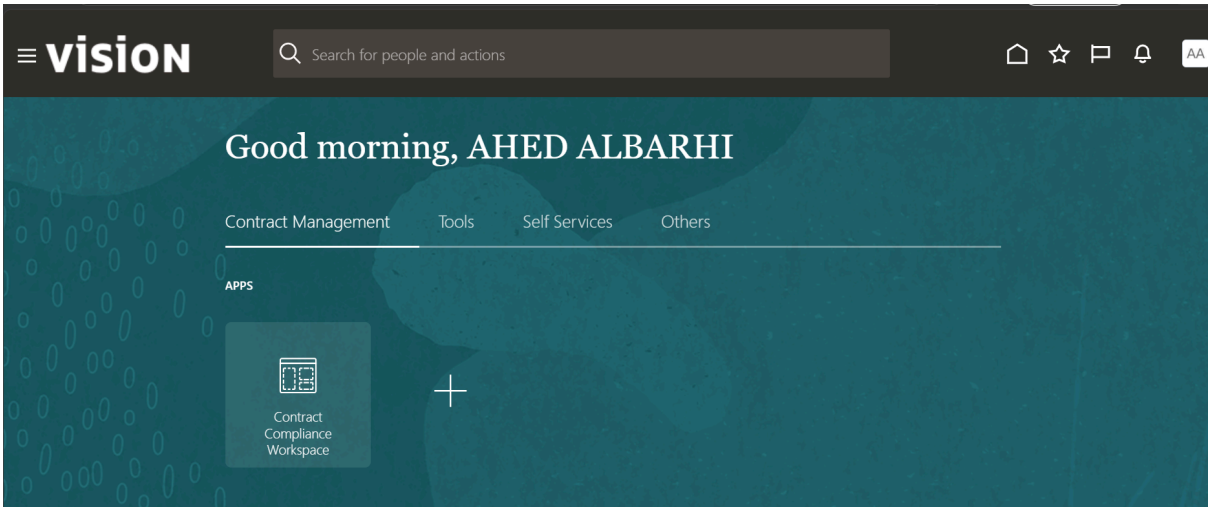

→Search “AHE”

→ click on display name, you will see there is no roles currently

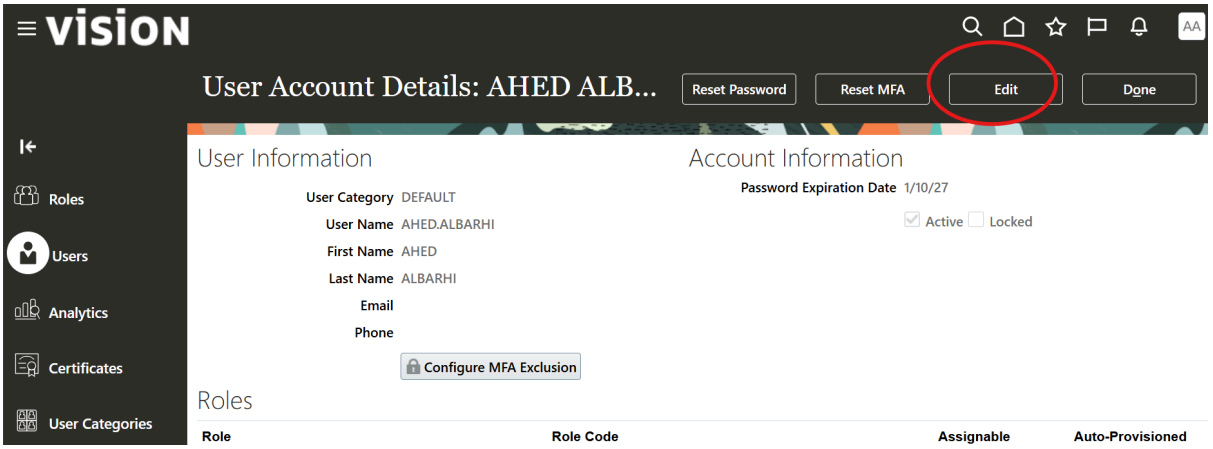

→ now I login with my account

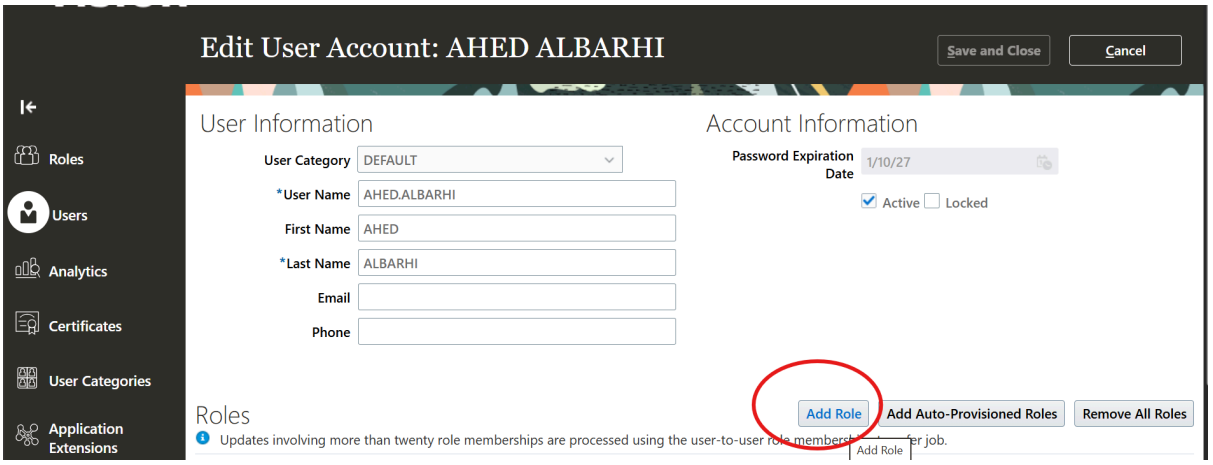

Notice : Fusion → role access based role, without it cannot do any actions

→ back to A.A user to assign roles for AHED

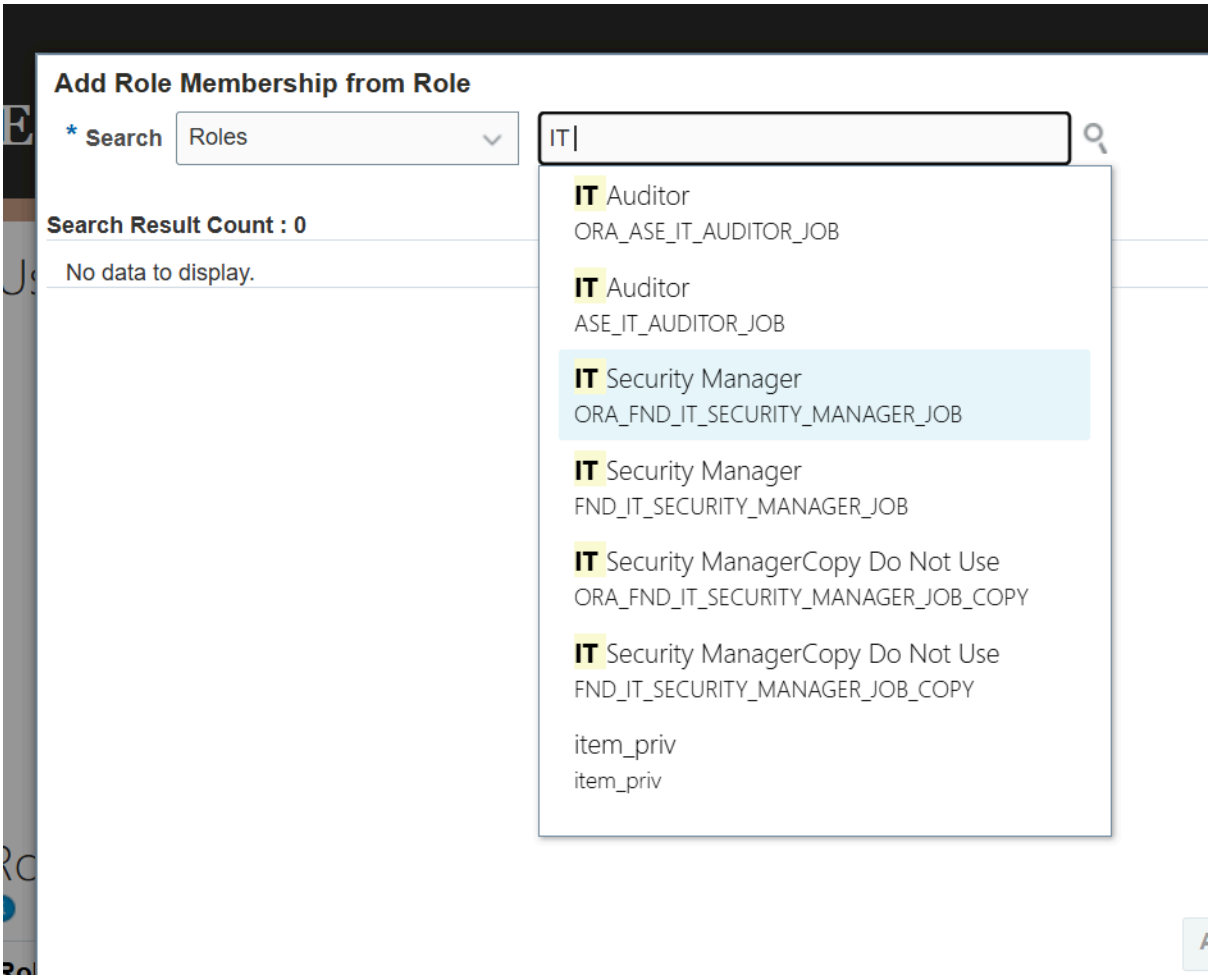

→ tools → security console → user → search “AHED” → click on your username → edit

→ add role

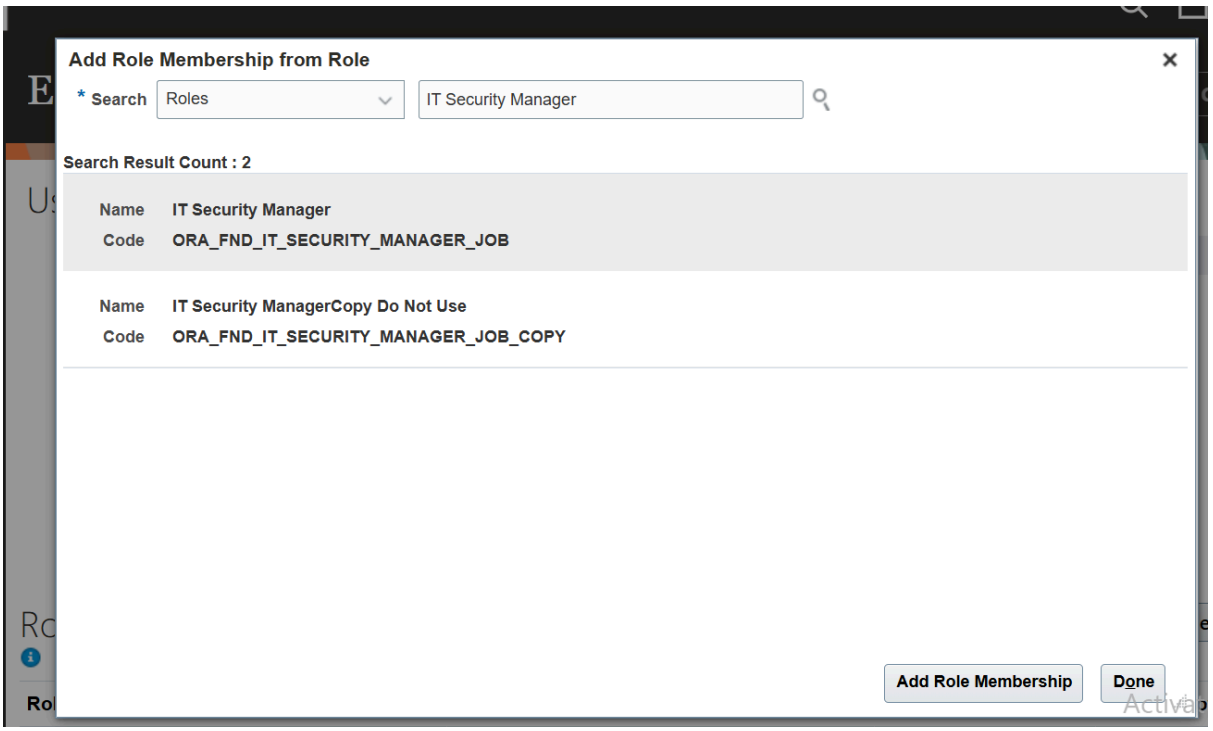

→ just in the training environment can login to A.A + assign IT security manager, so i can then add others roles to my selfe .

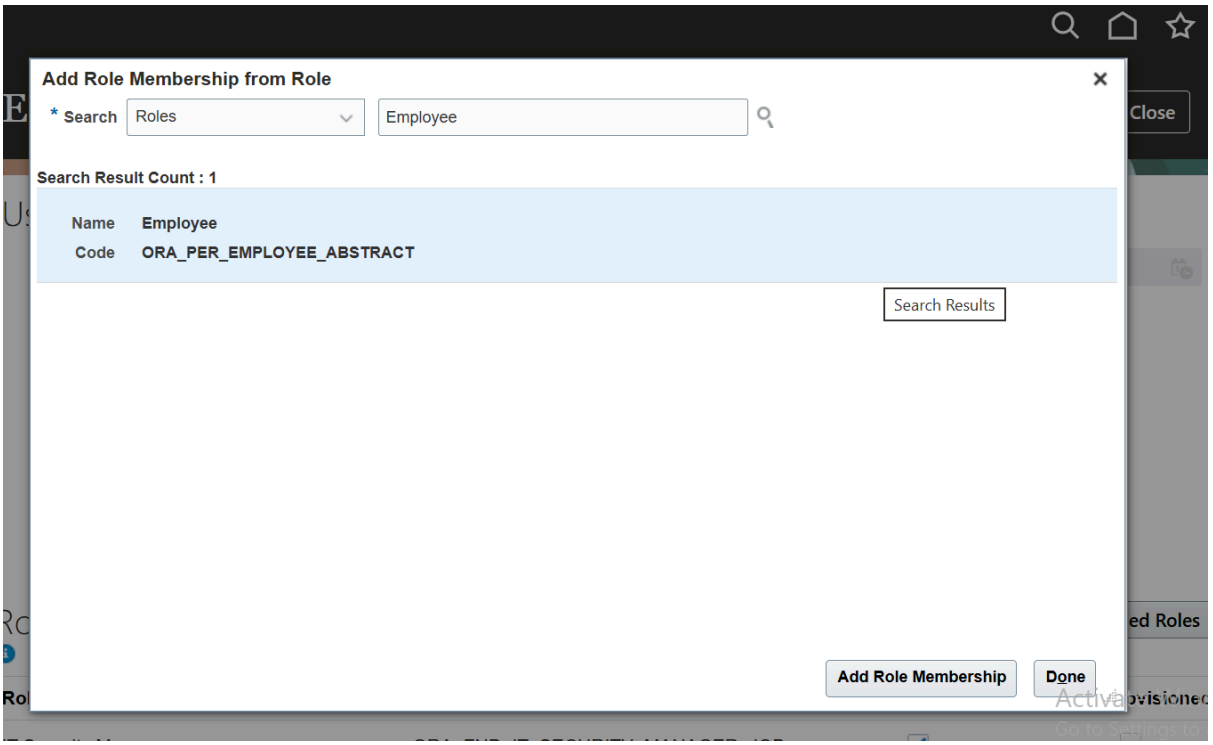

→ chose the without copy

→click on add role membership

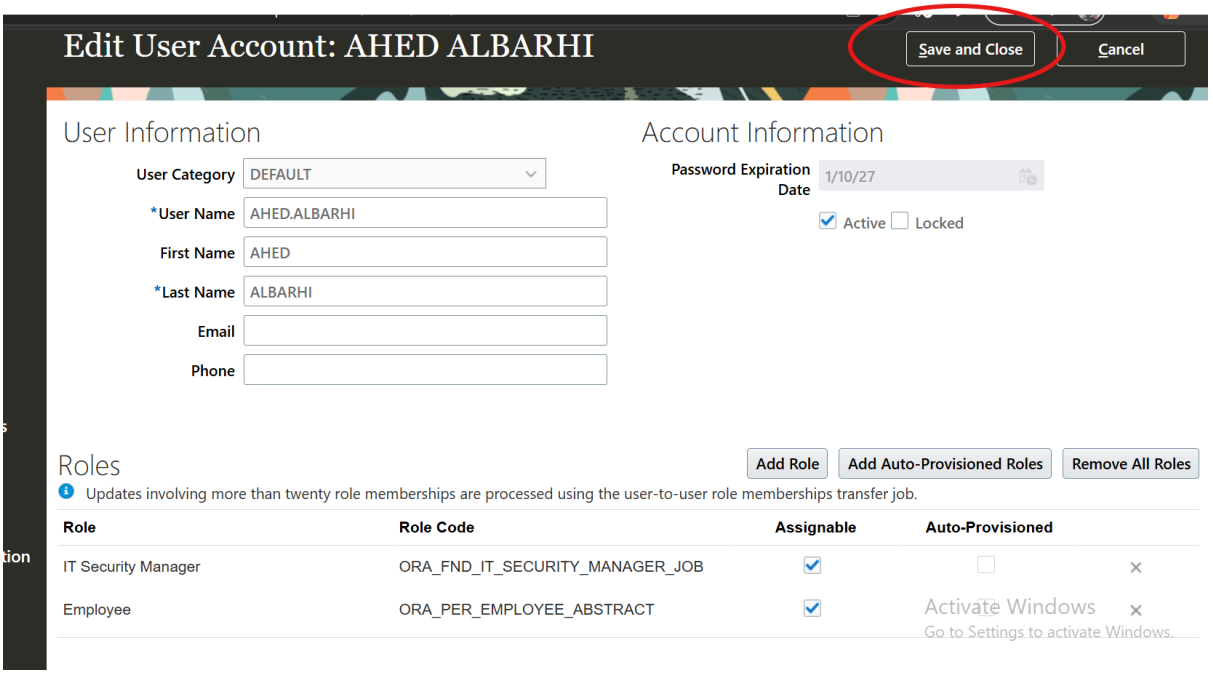

→ search “Emp”

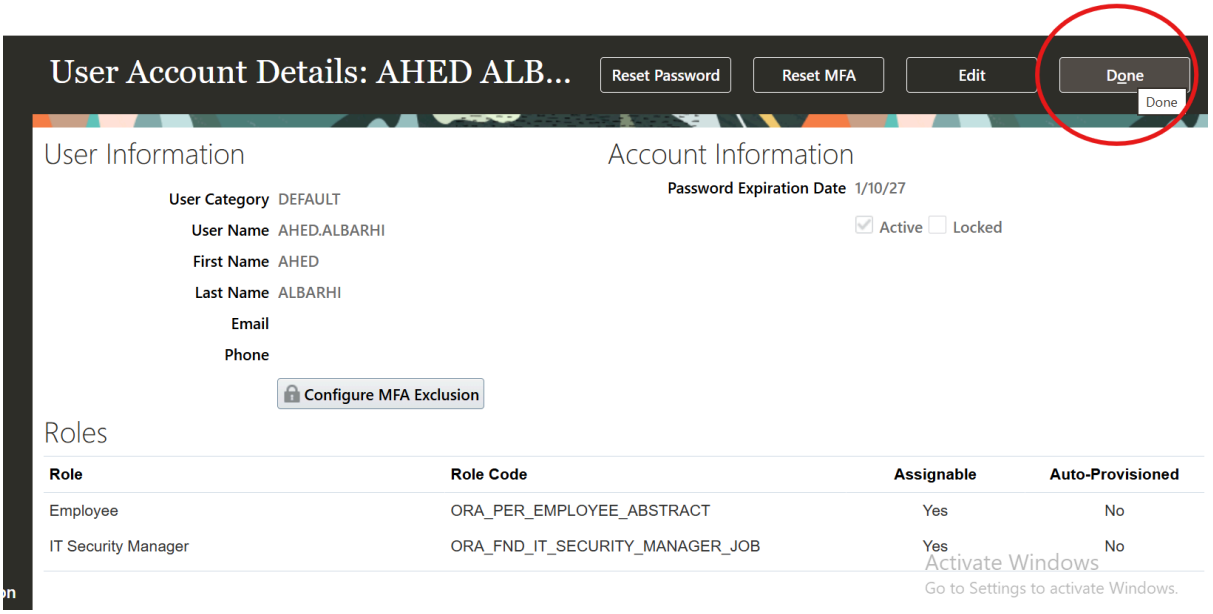

→click on add role membership

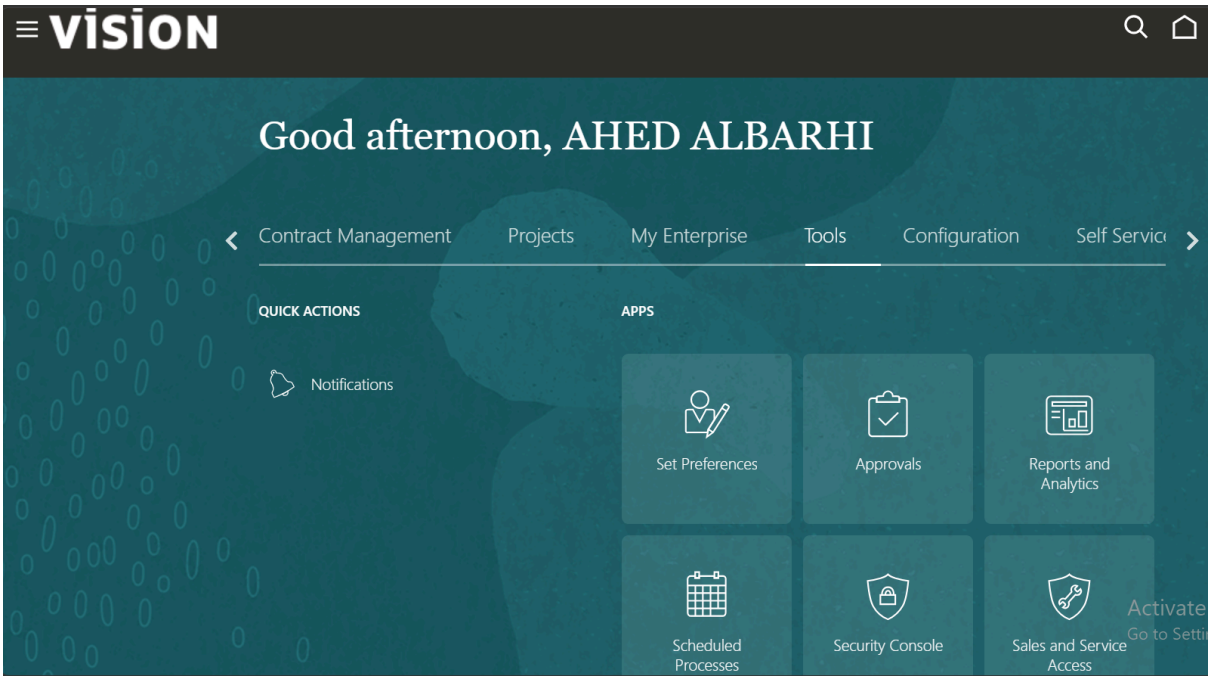

→ save and close

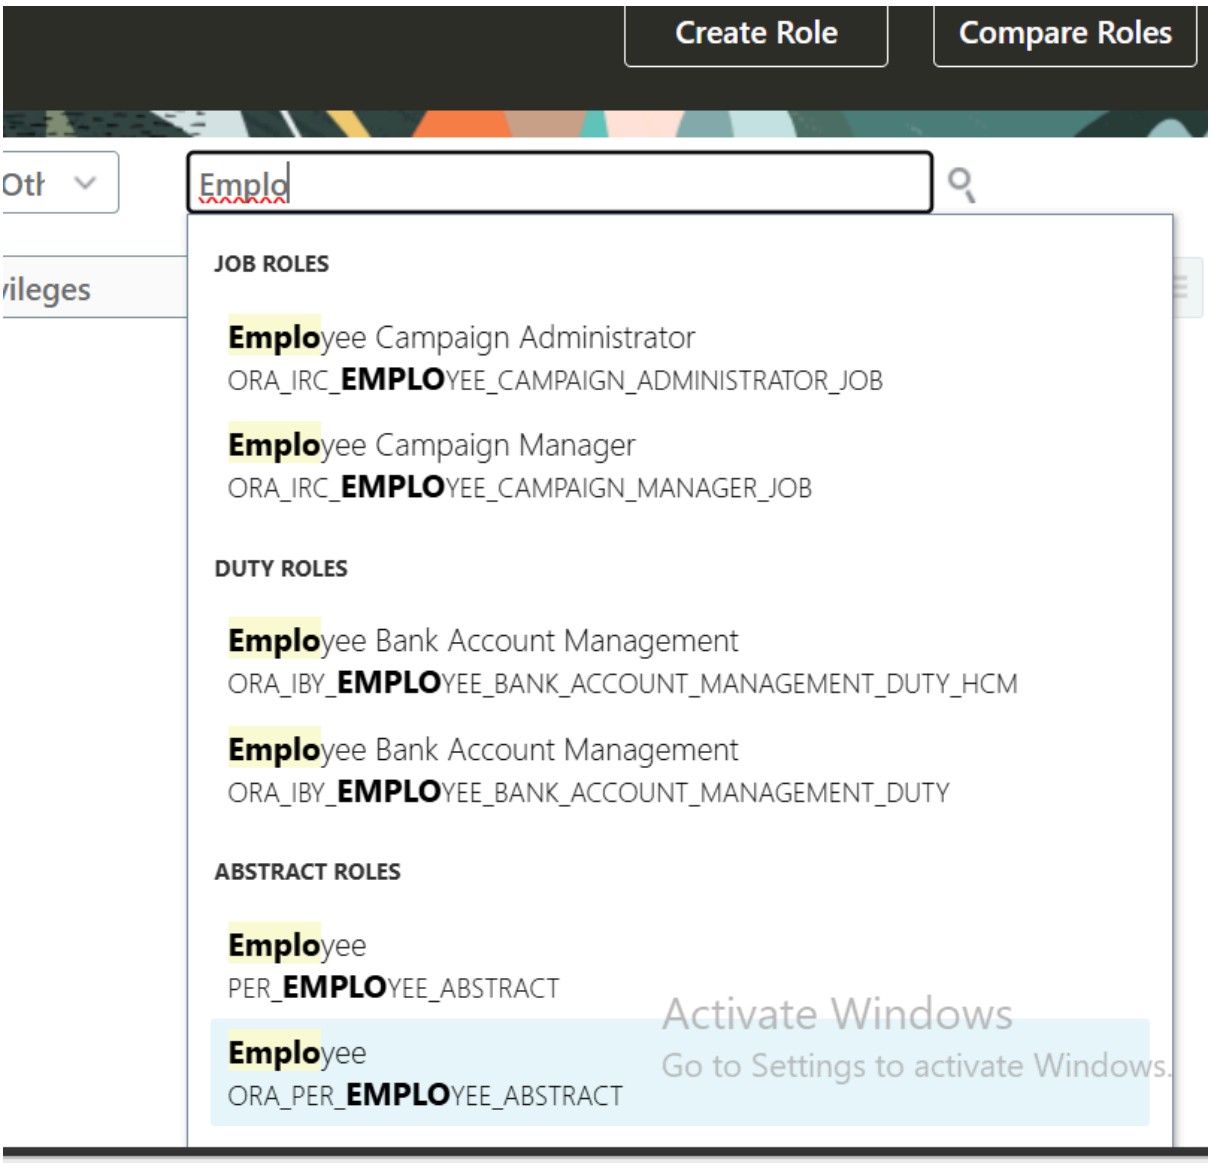

→Click on Done

→ login with AHED

→ tools → security console → user → search “Emp”

→ Notice: when assigned a role for that user all privileges will be set for that user .
→ whats you wants just see
