→ Convert parameter to LOV

→ click on edit

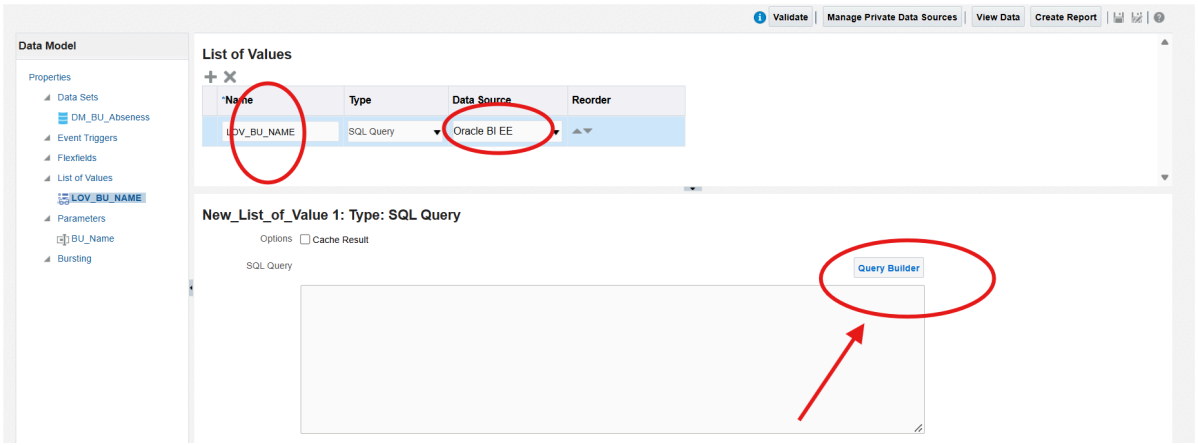

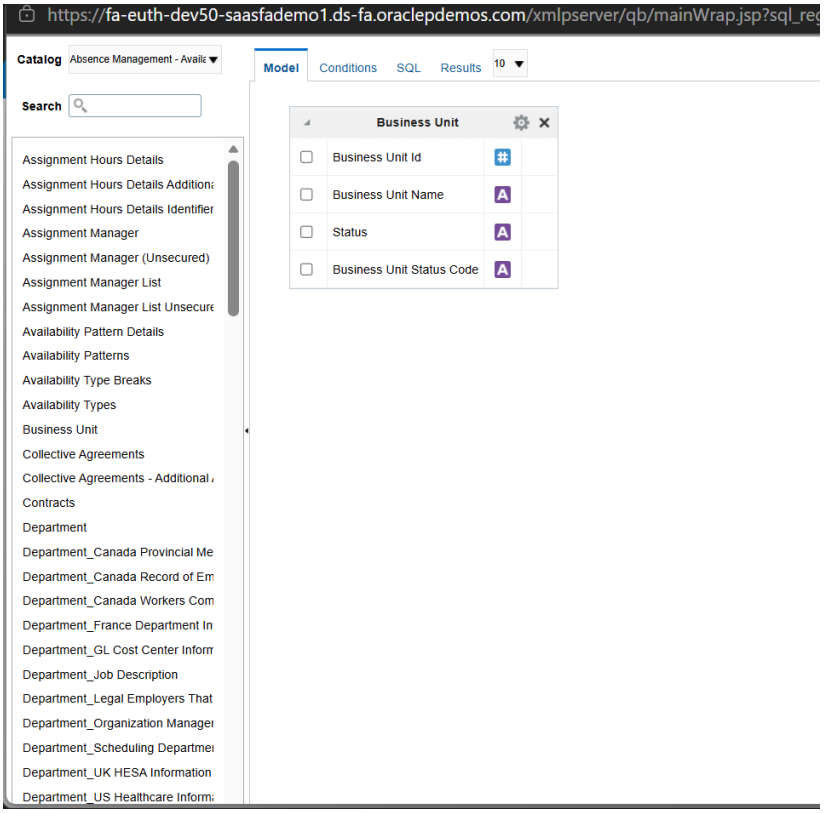

→ named as " LOV_BU_NAME" → Select data source as : Oracle Business Intelligence Enterprise (Oracle BI EE)

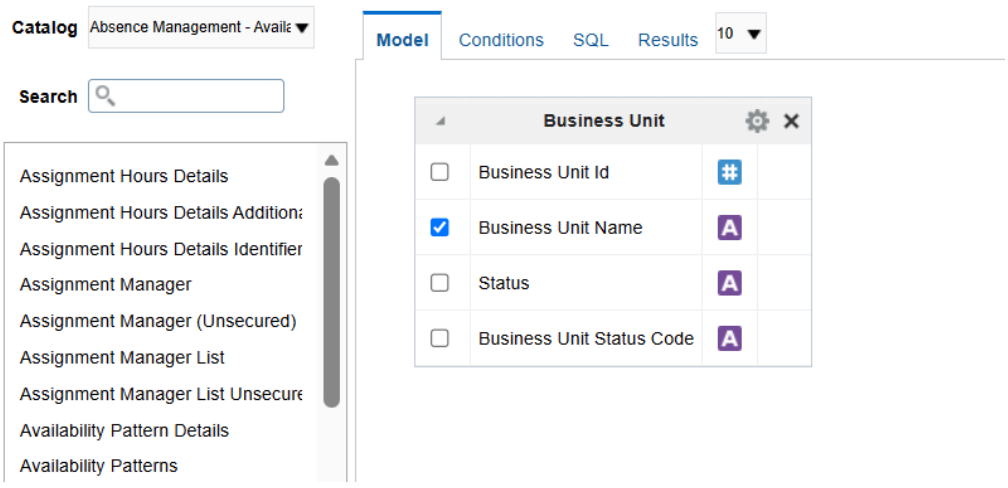

→click on Query Builder

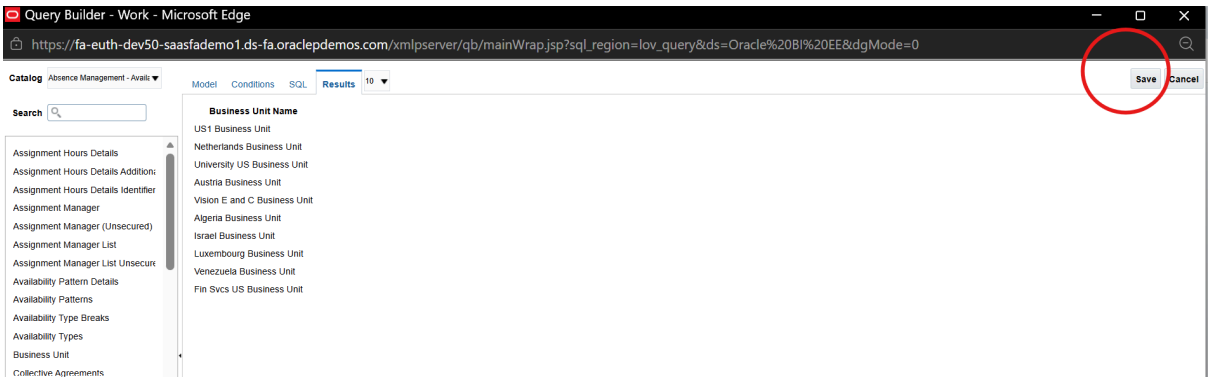

→ select business Unit

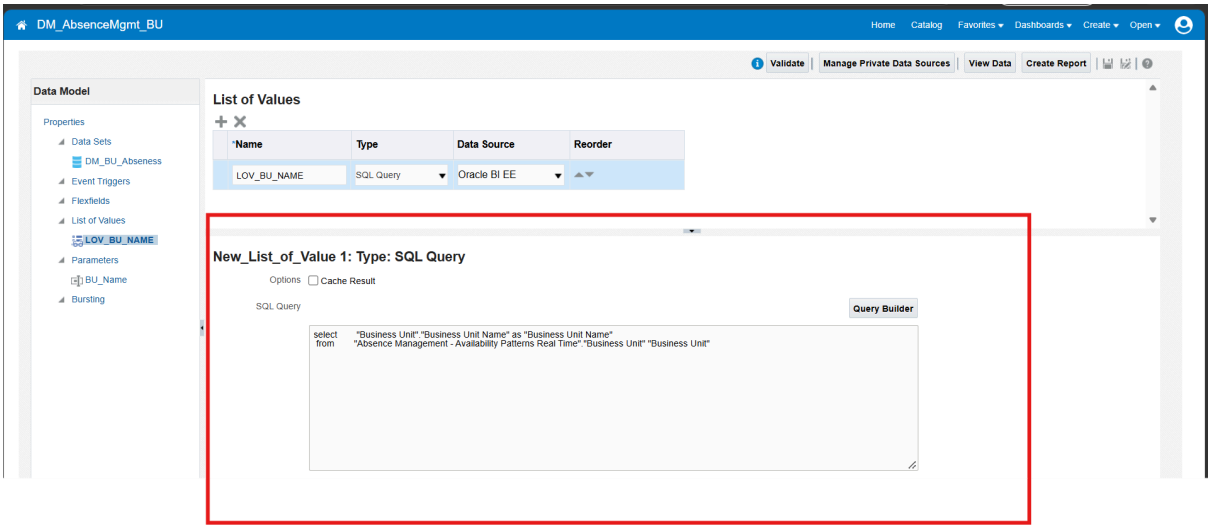

→ Select Business Unit Name because my parameter based on it→ click save

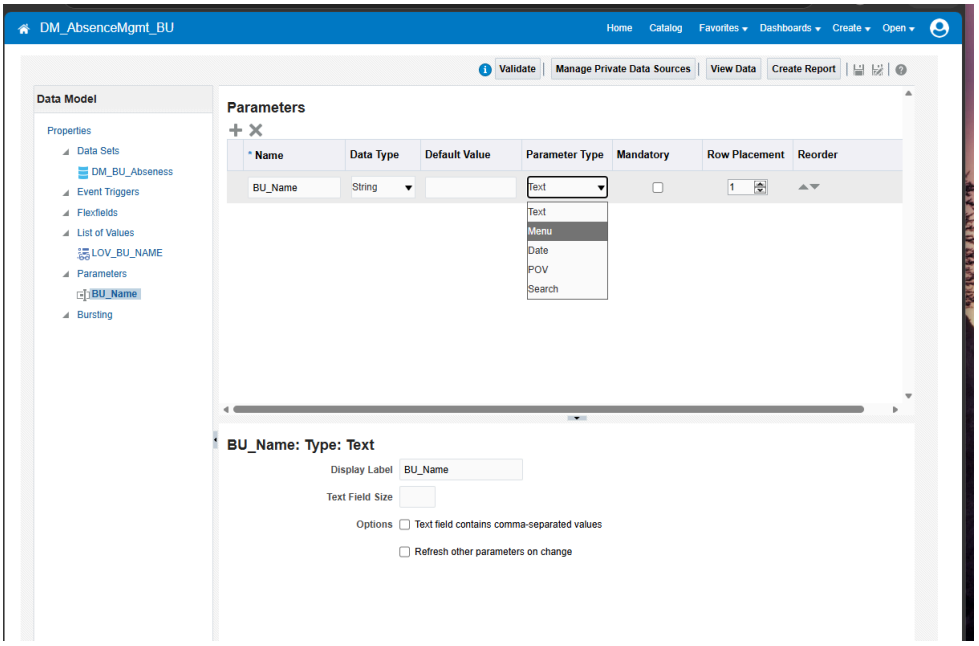

→ immediately will appear my query here

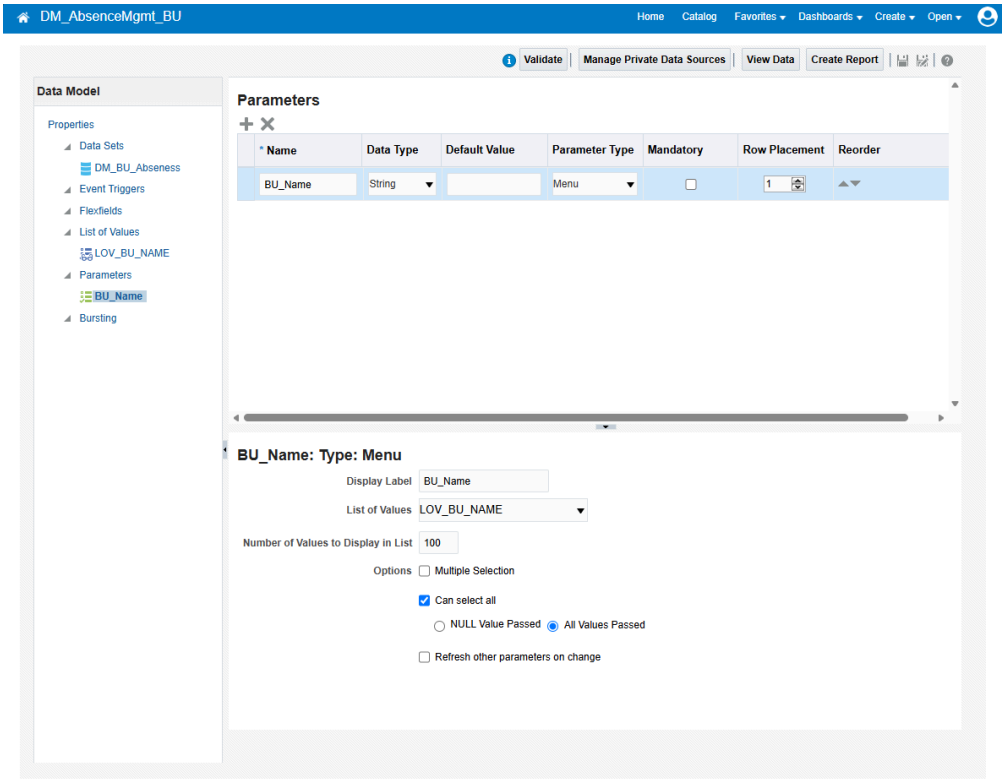

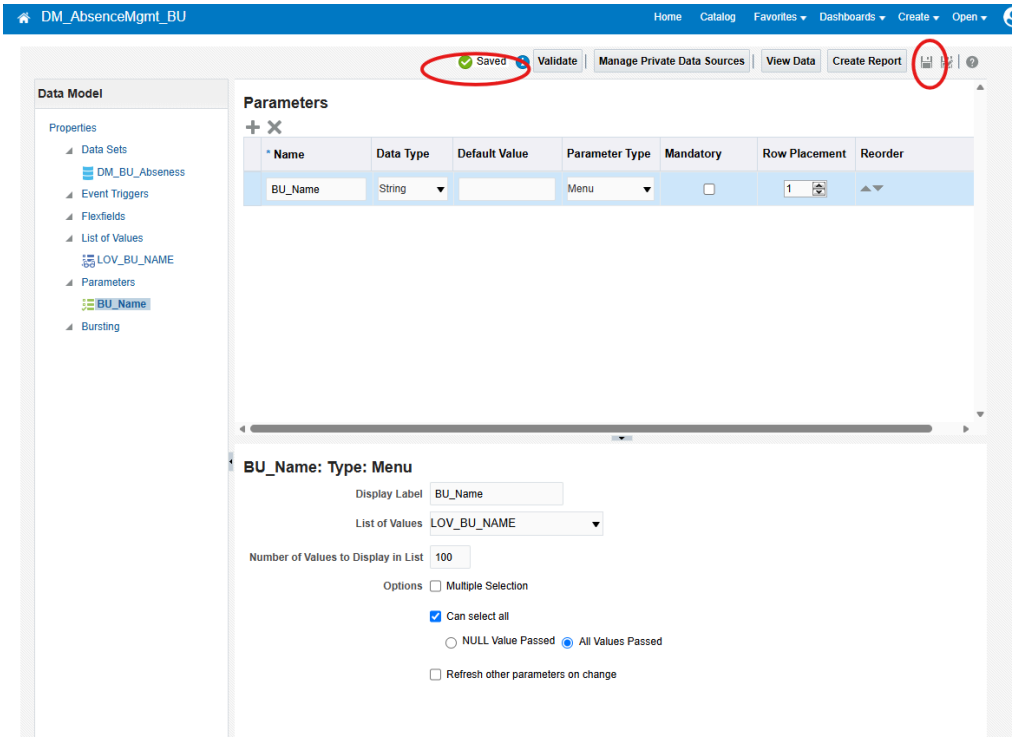

→ saved

→go to parameter

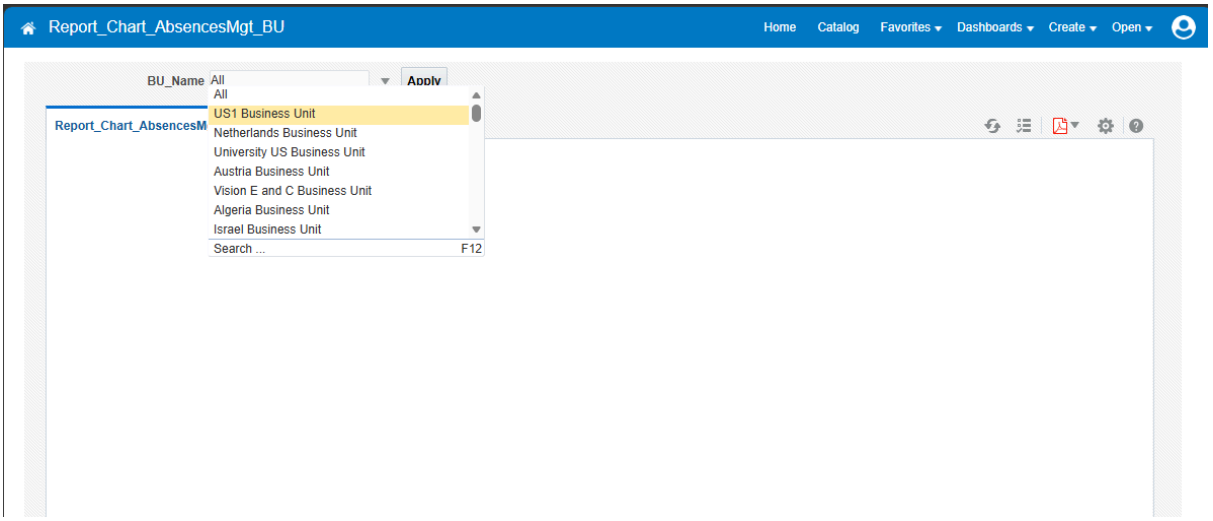

→ to attached the LOV to the parameter in the parameter type chose “Menu”

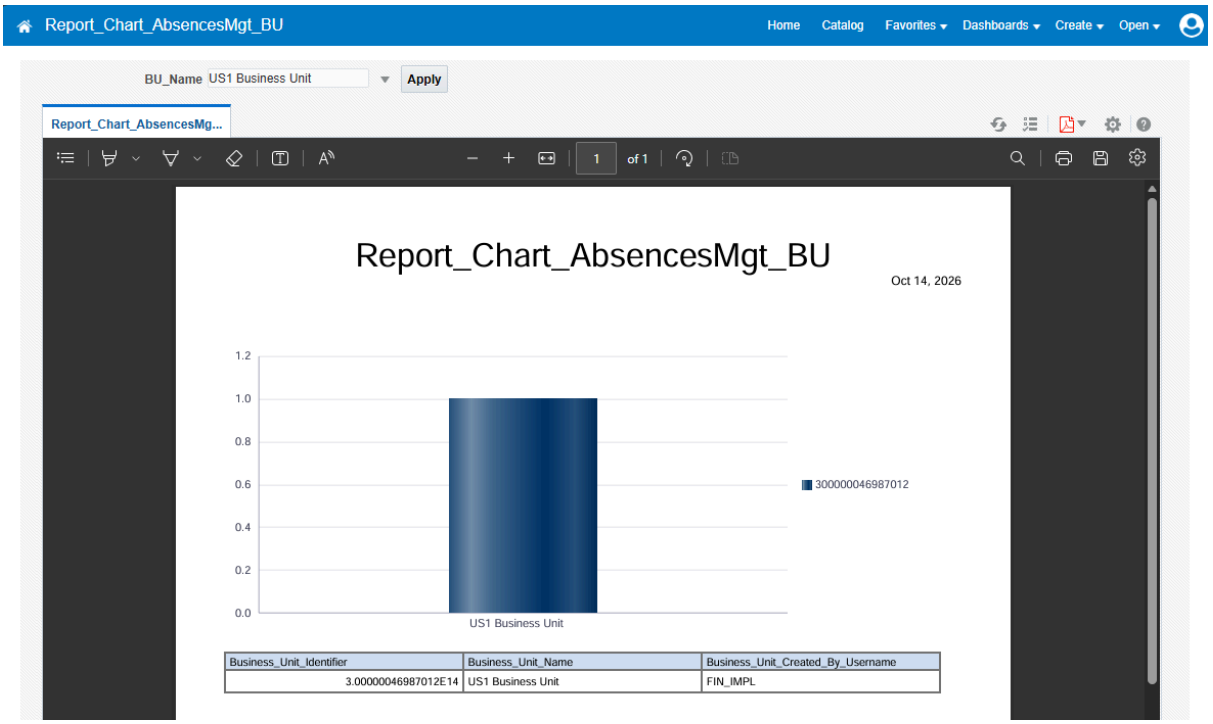

→after saved → click on catalog → open again the report
-You will see the LOV at top → select what you want

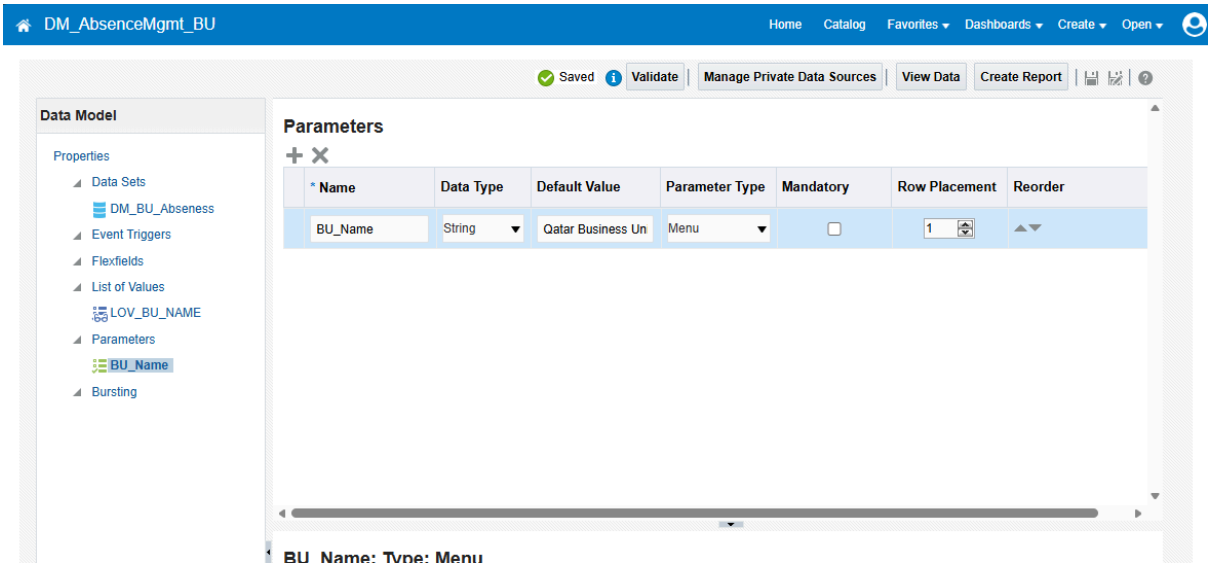

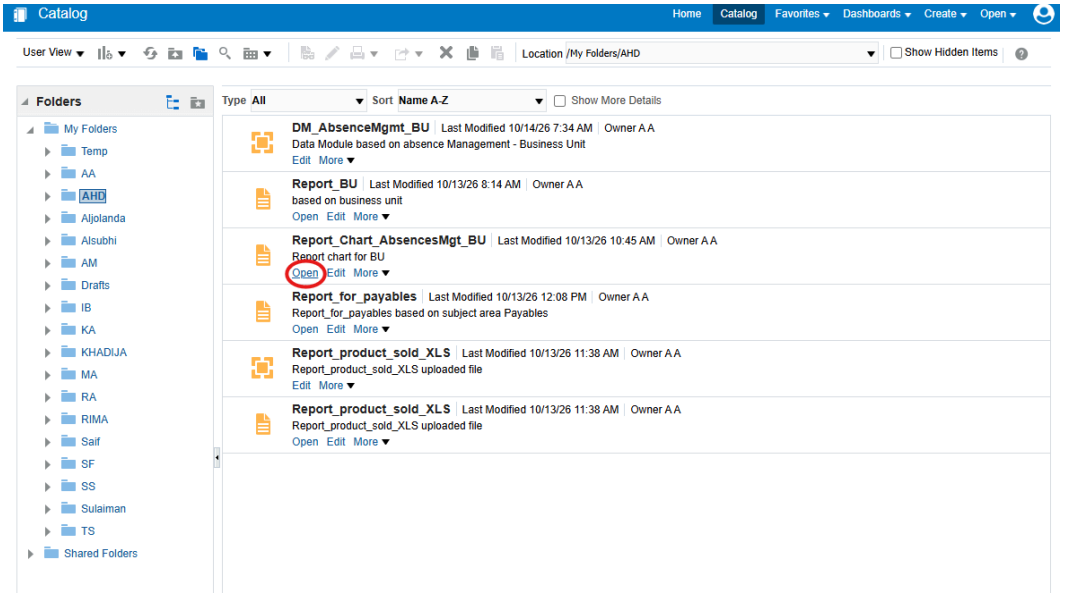

- Thats How attached LOV to parameter
- You can but default value

→ back to report click edit

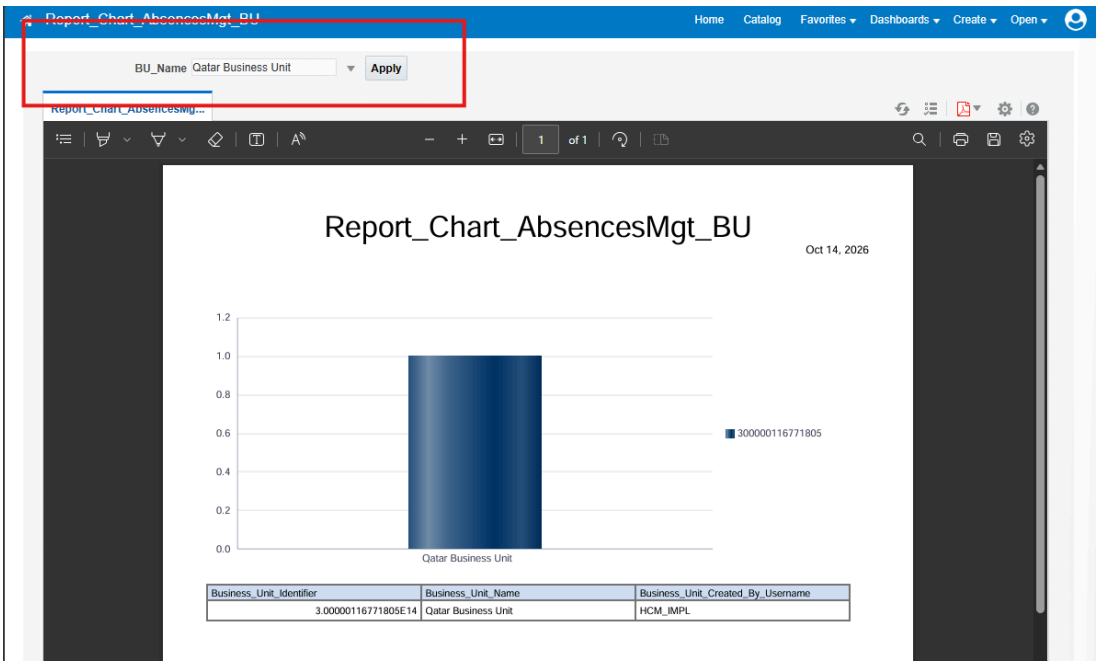

→ in default value add “Qatar Business Unit”

→ click catalog to back and open the report

→ will appear at top

Now created:

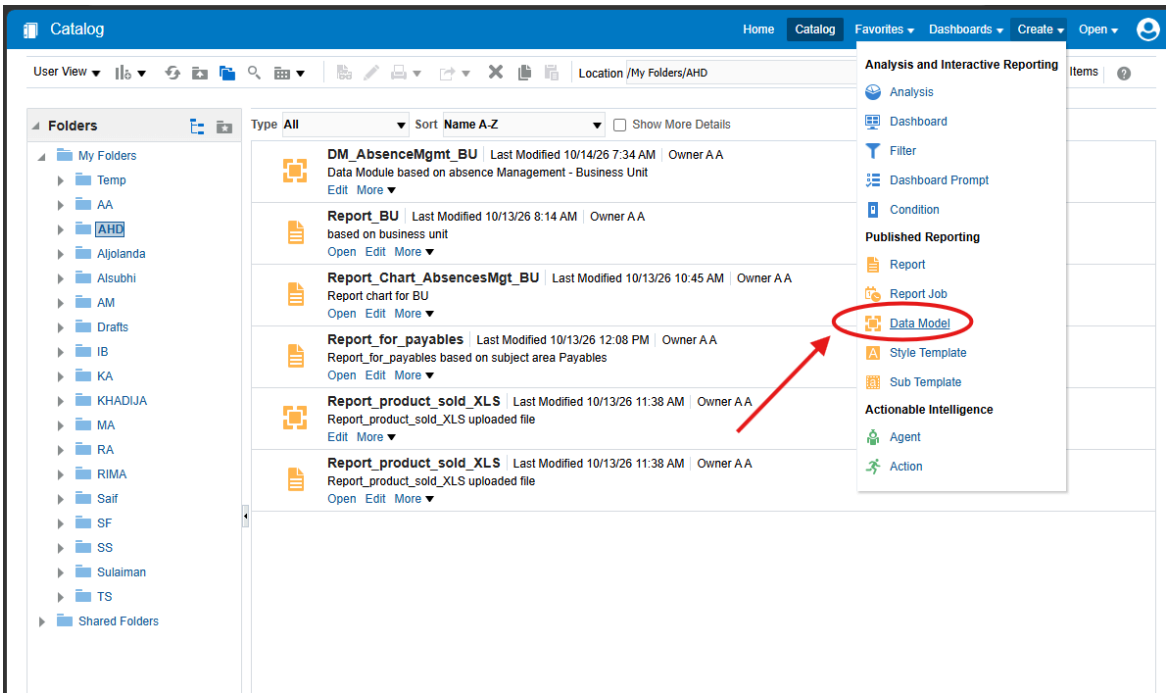

1-Data model

2-Parameter

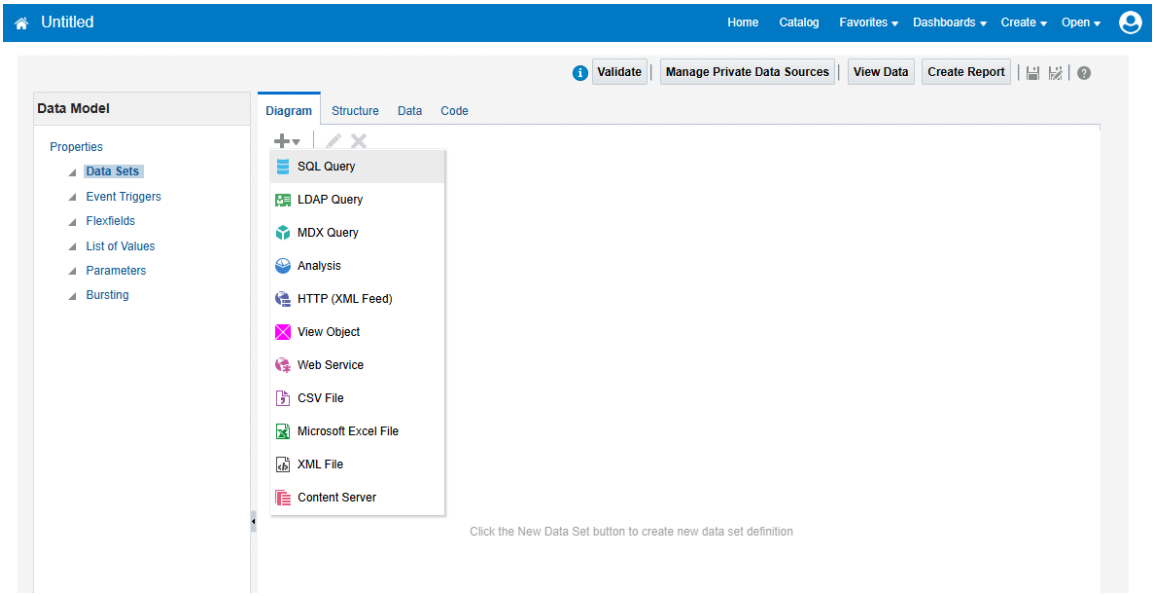

3-LOV

4-Finally report

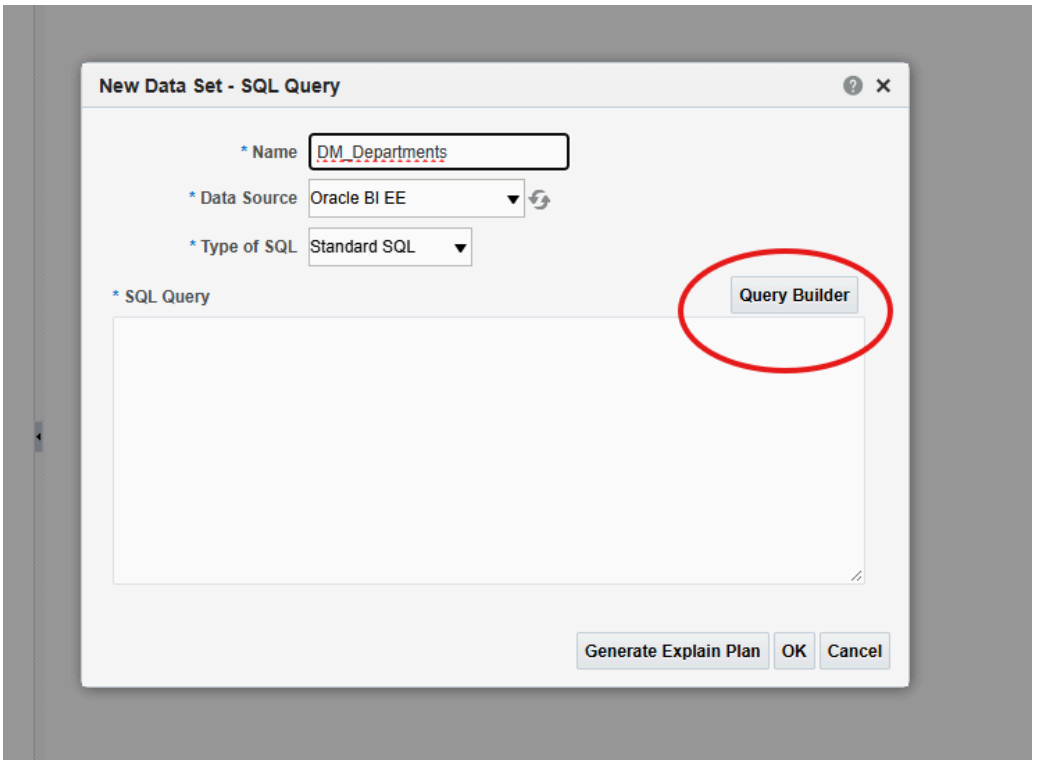

→ click catalog to back → then create DM

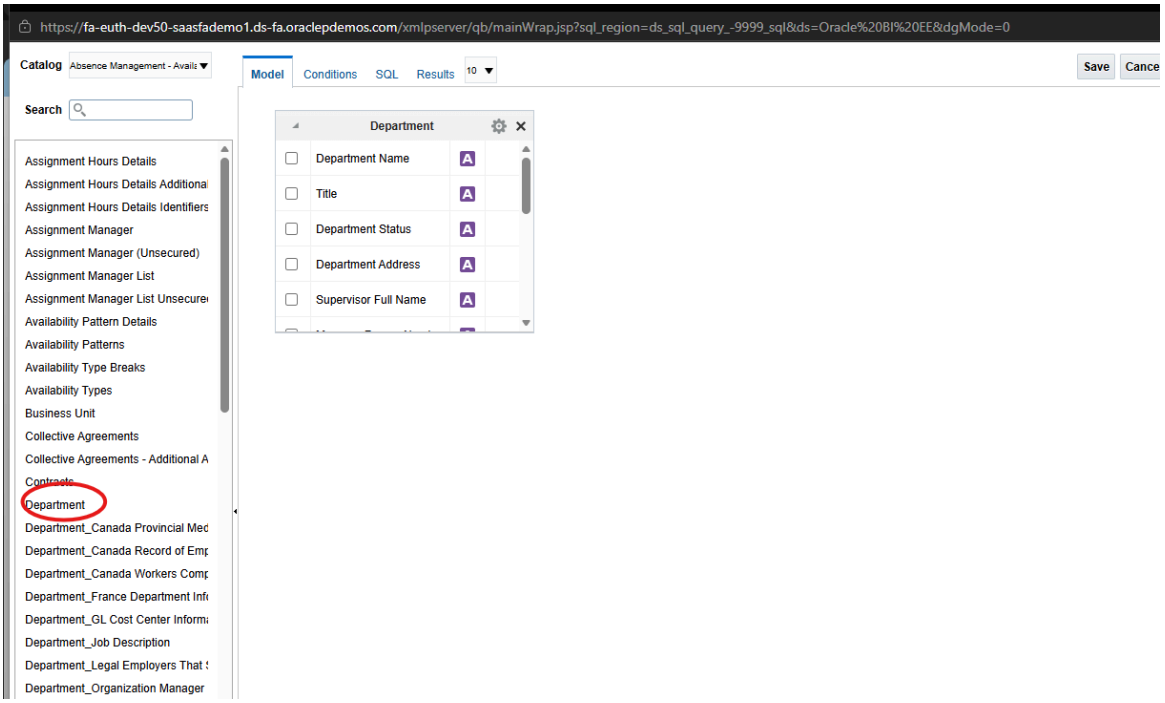

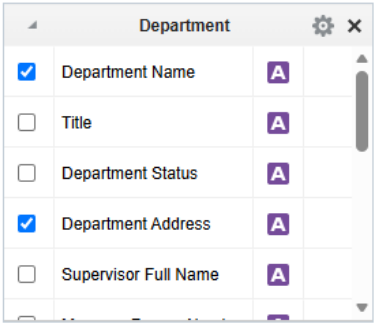

→ select SQL query

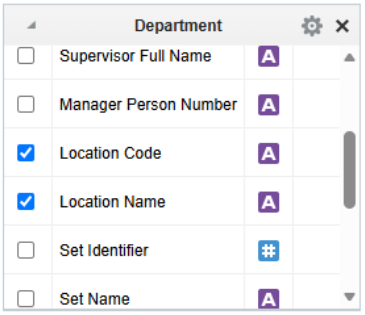

→named “DM_Deparatments” →Oracle BI EE → click Query Builder

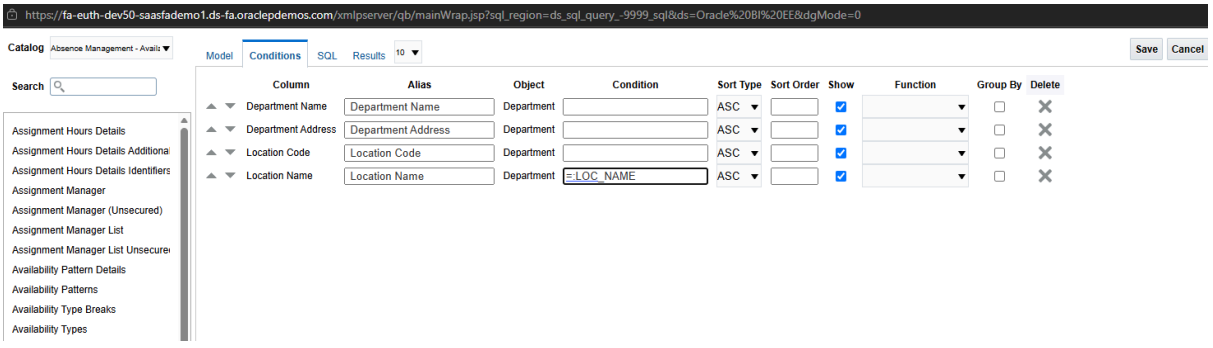

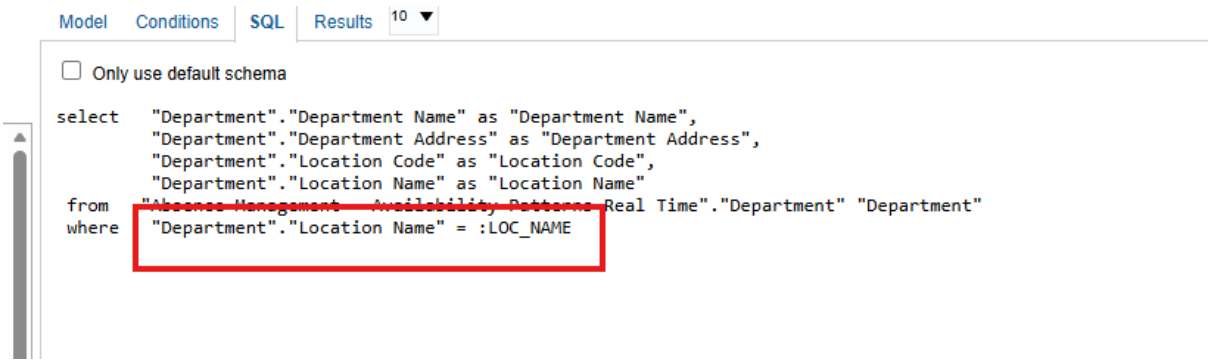

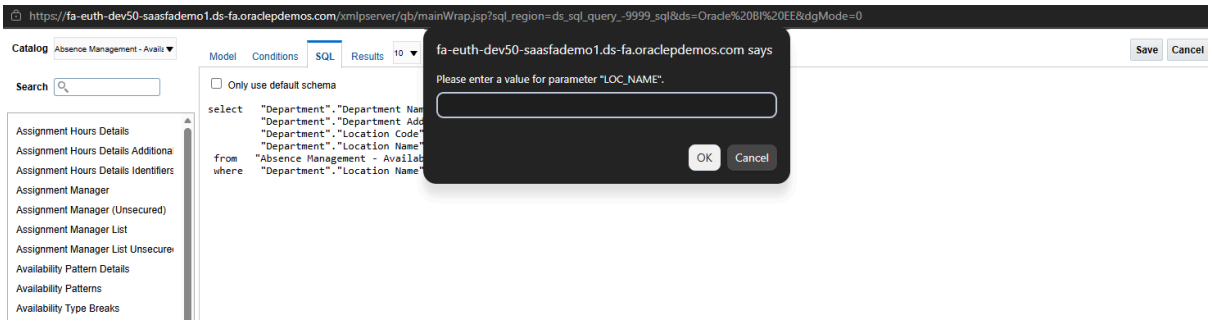

→ go to conditions at top → create parameter , condition its where clause "= :LOC_NAME"

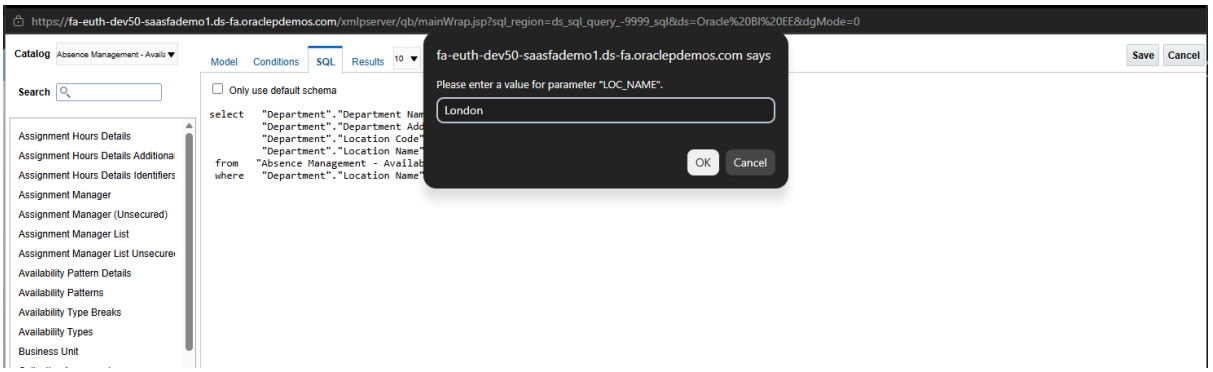

→ go to SQL

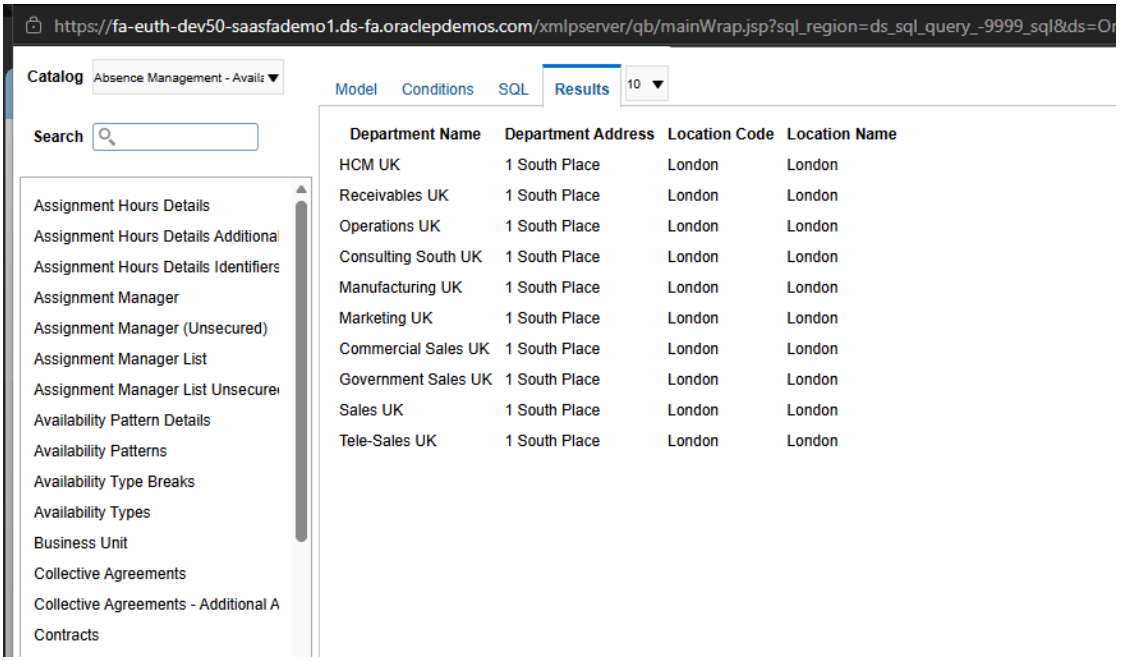

→ then click on result

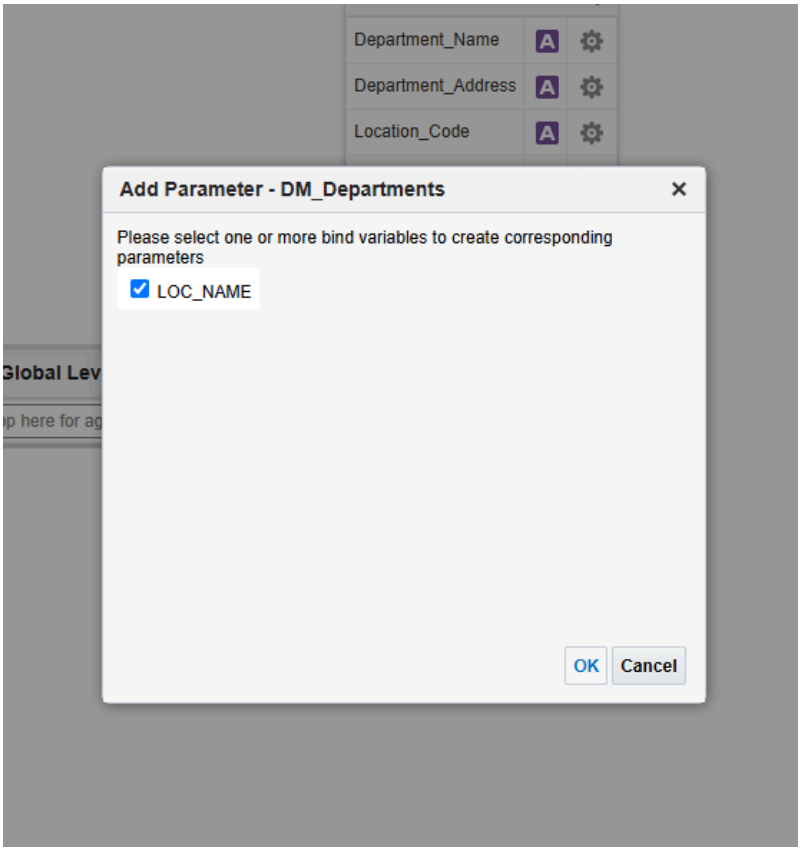

→ will enter value : London → ok

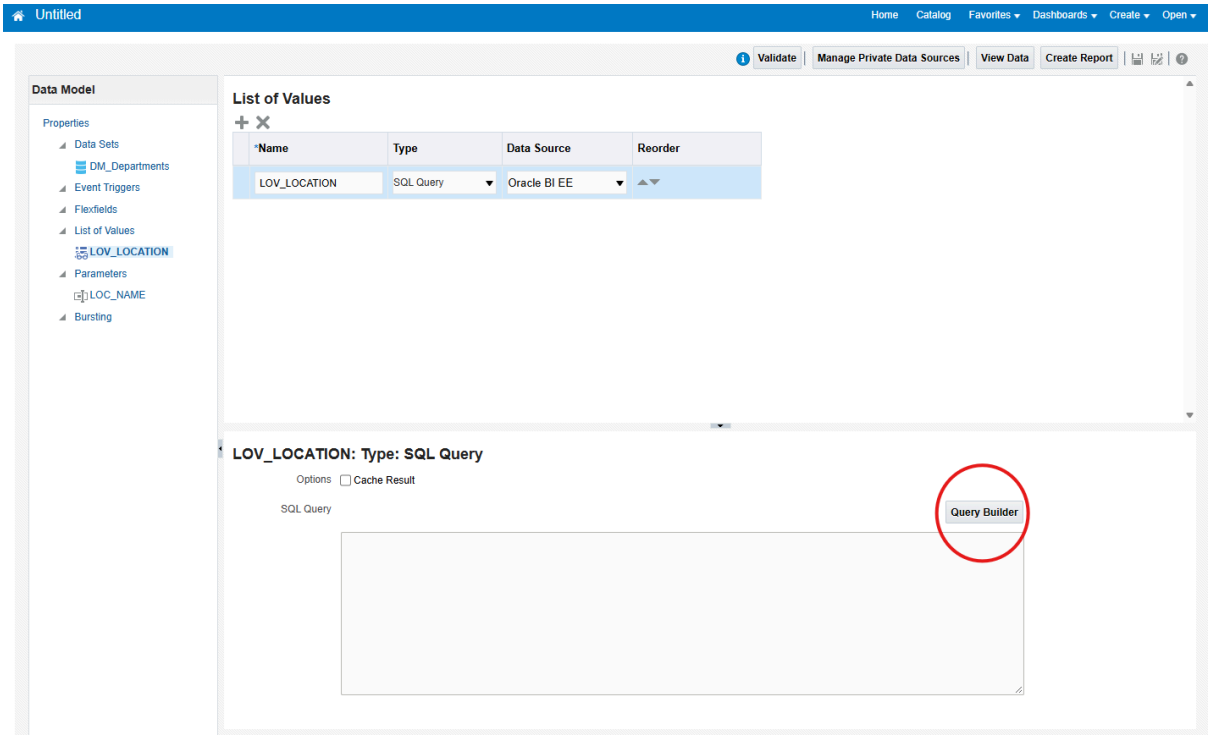

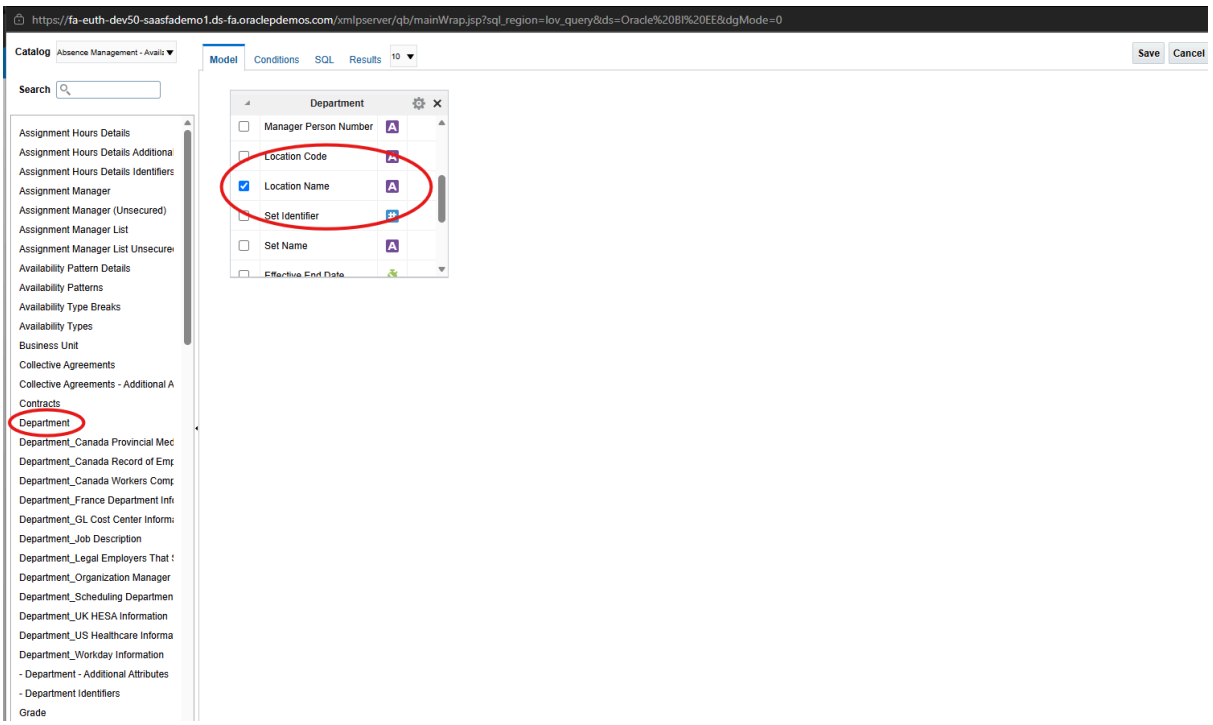

→save

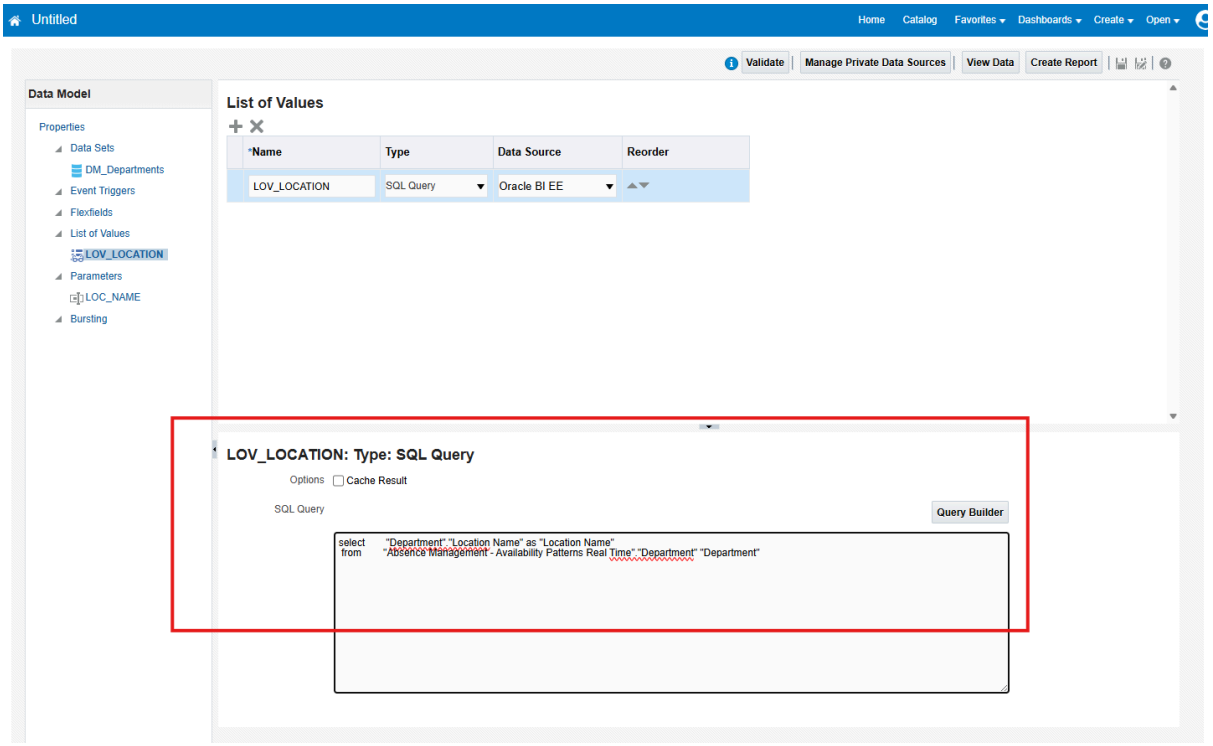

→LOV → named “LOV_LOCATION” → Oracle BI EE → Query Builder

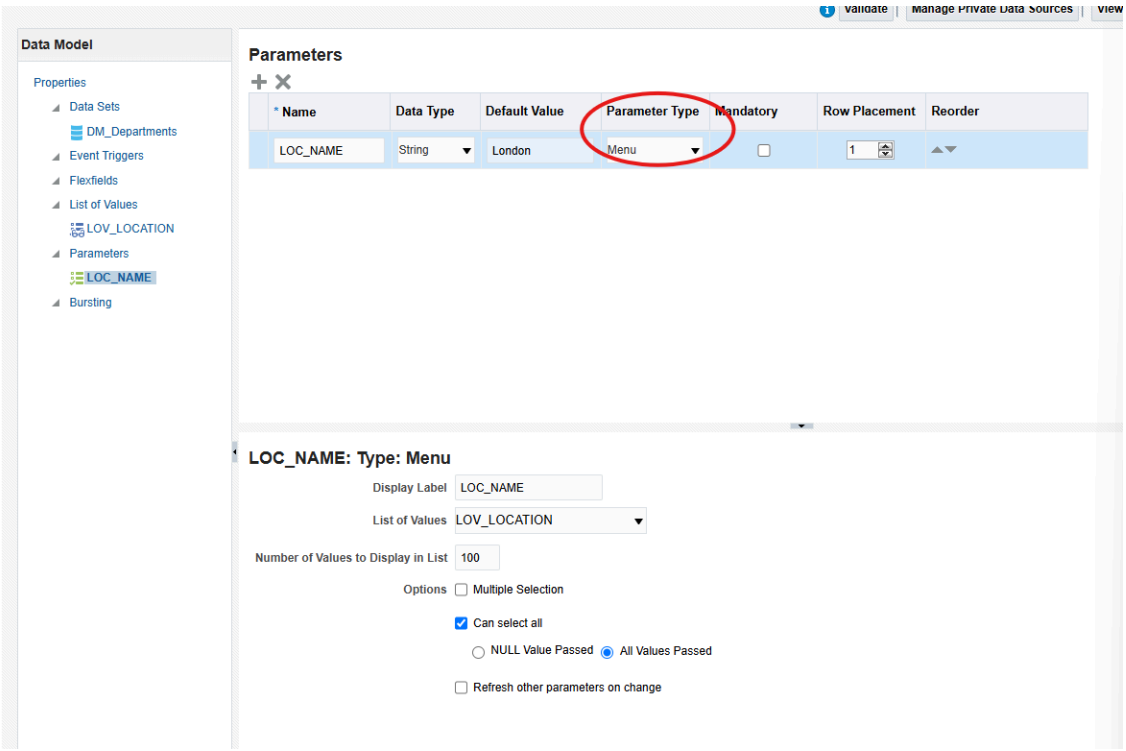

→ saved

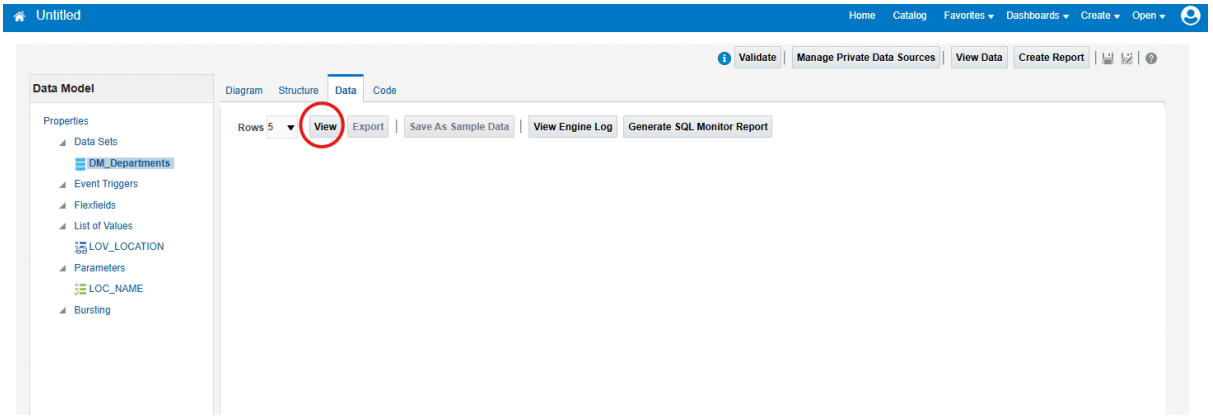

→ Query will display here

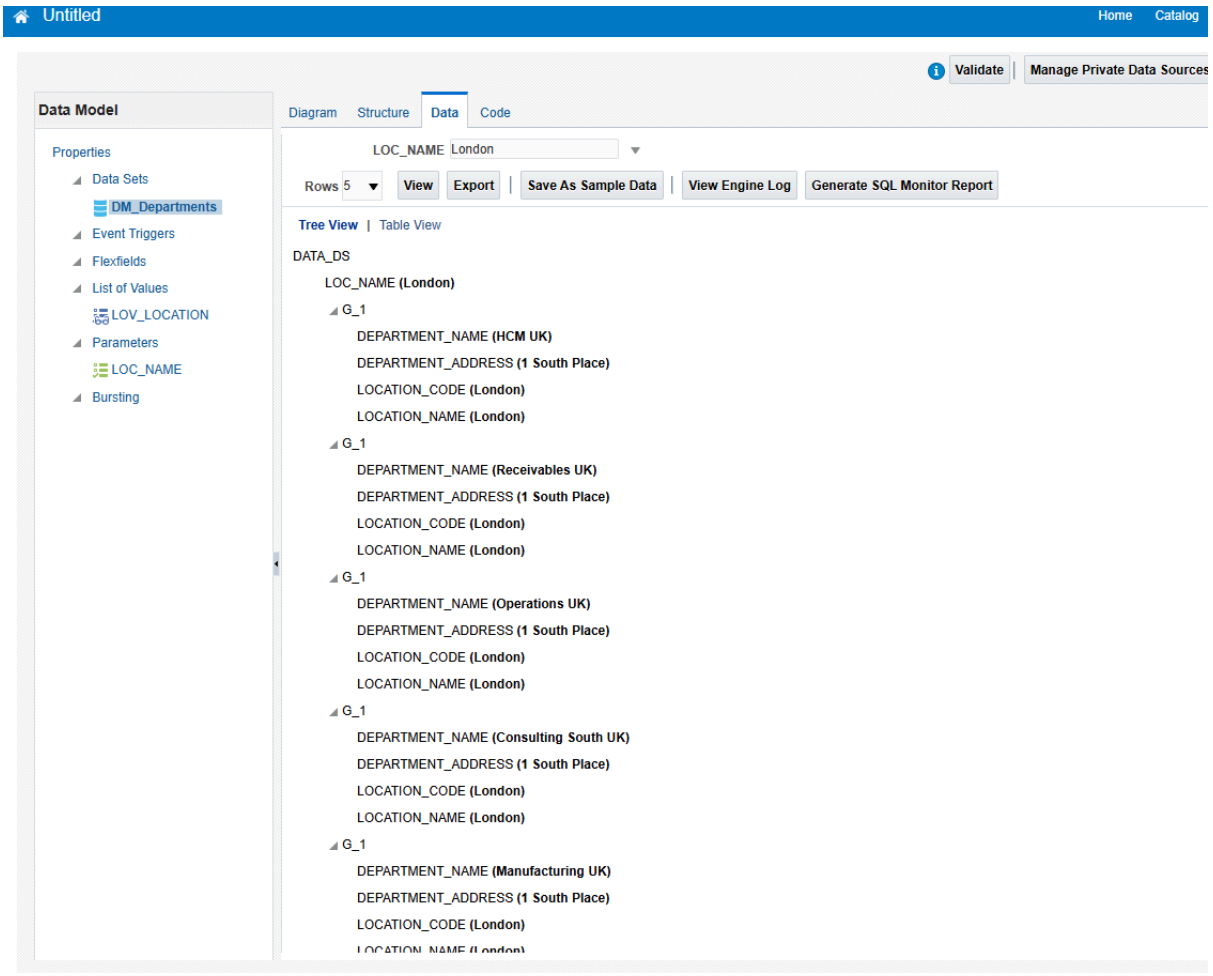

→ go to parameter to attached LOV

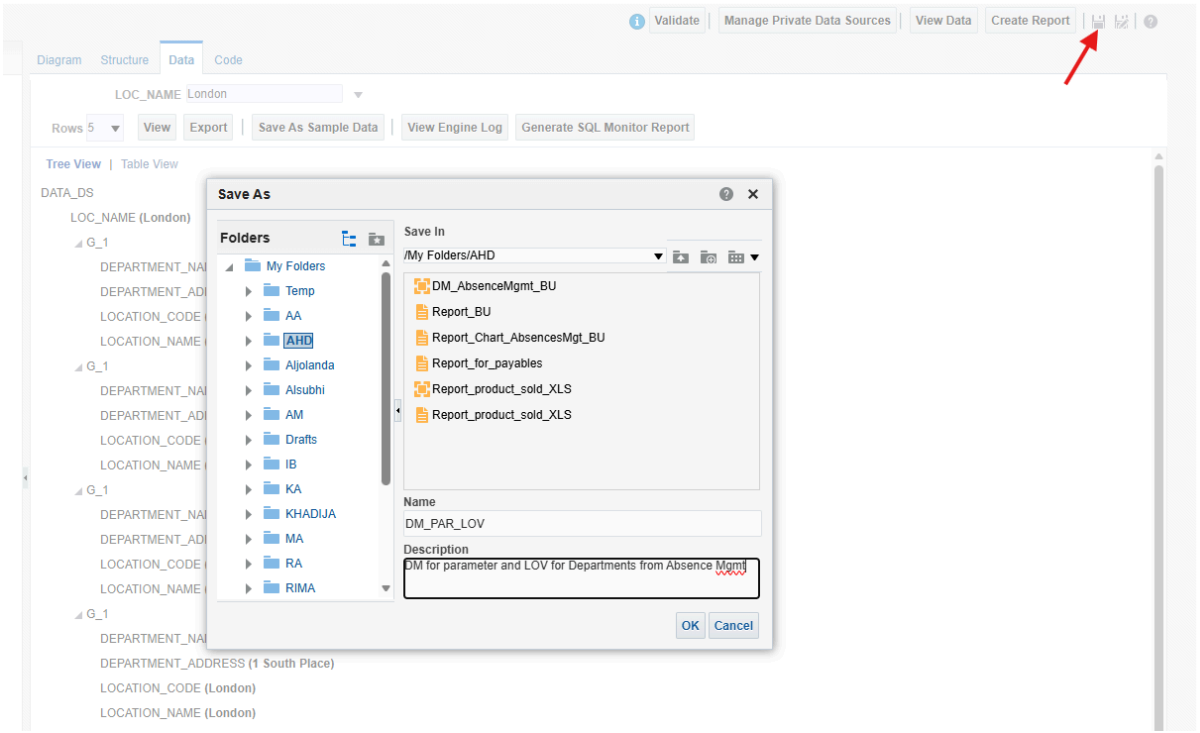

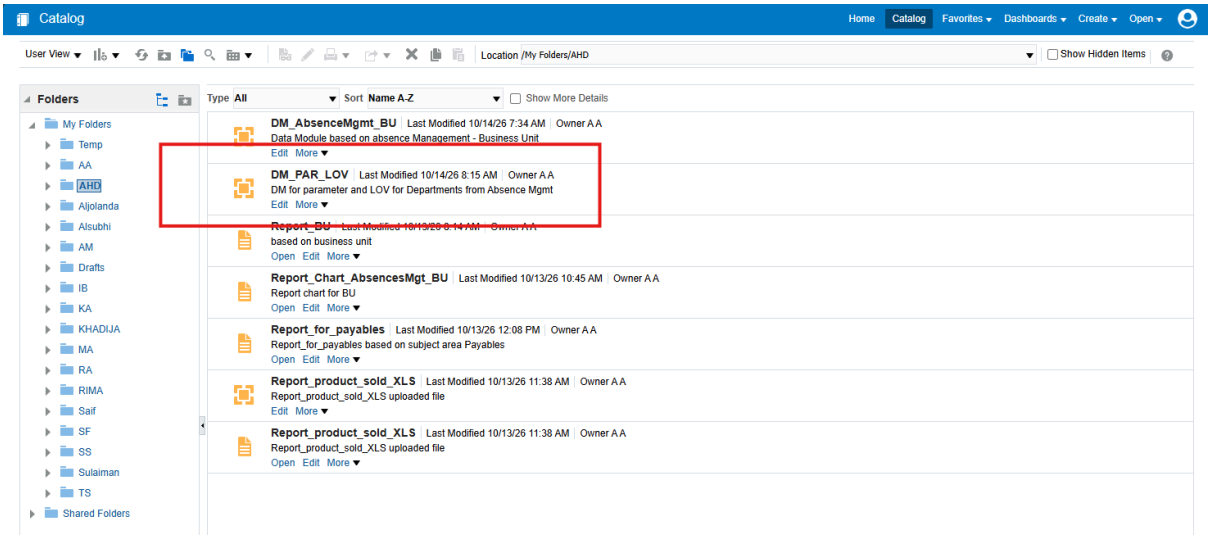

→ select DM → data → view

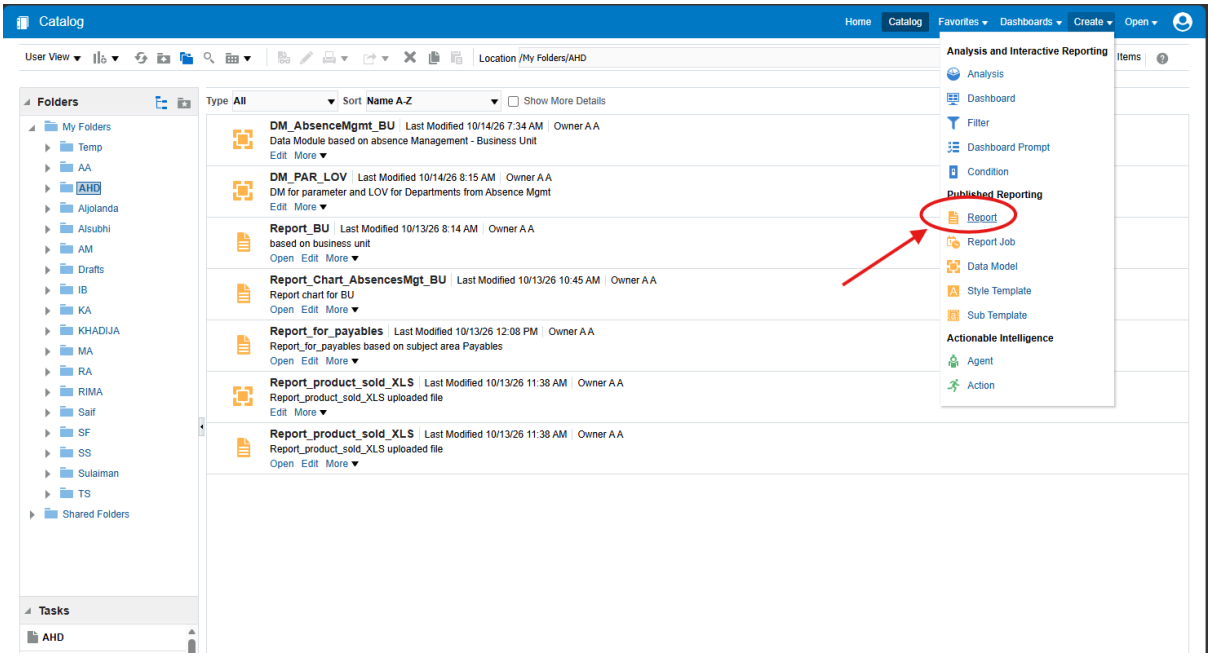

→ click on save as sample data → then click save up

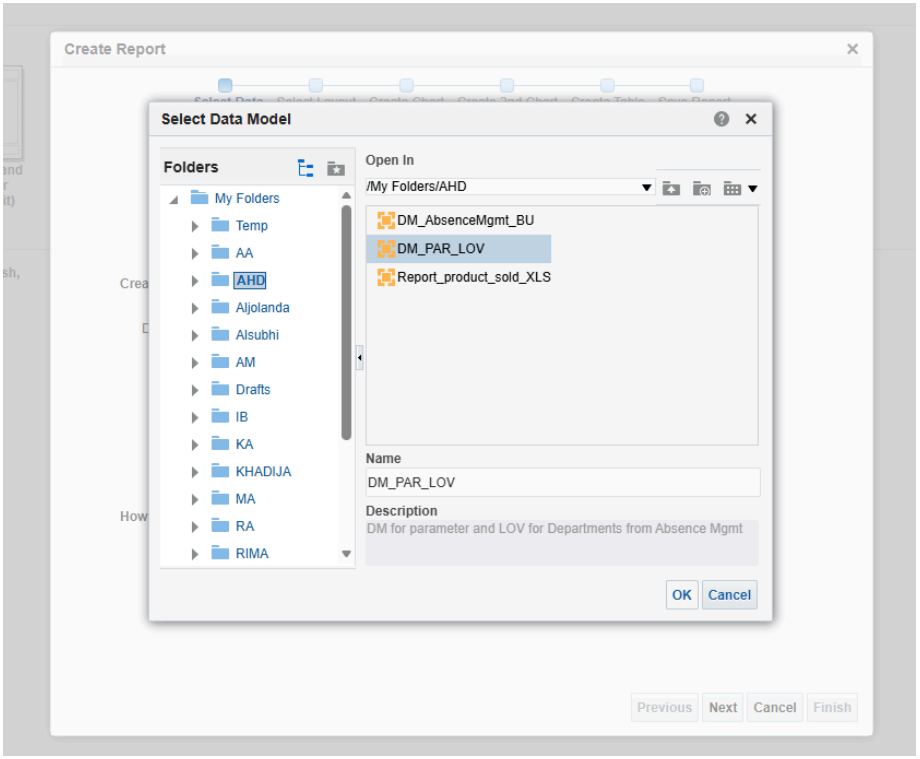

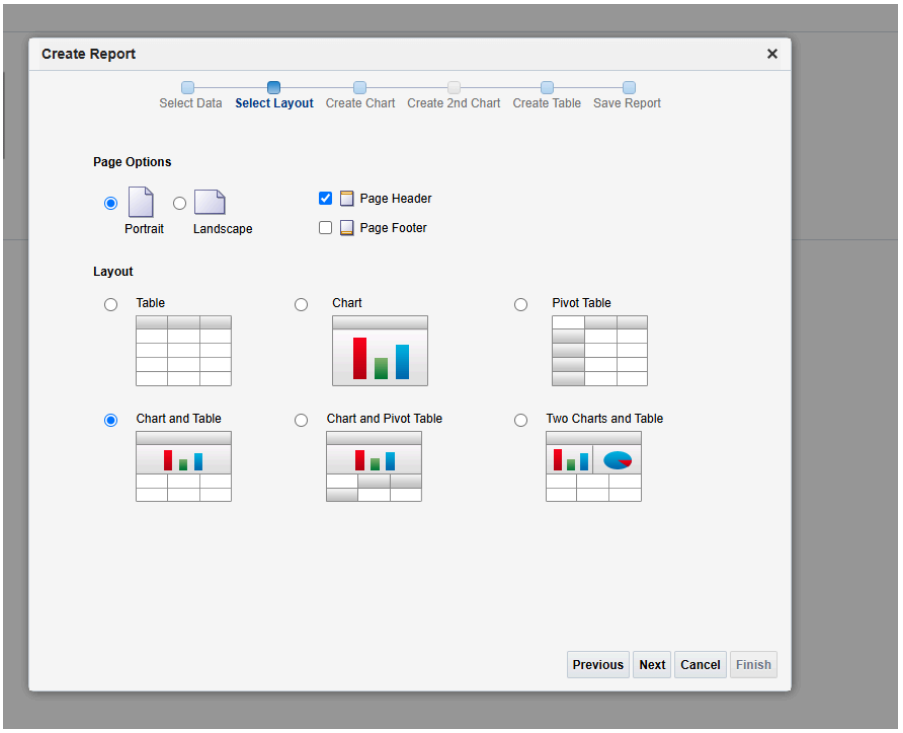

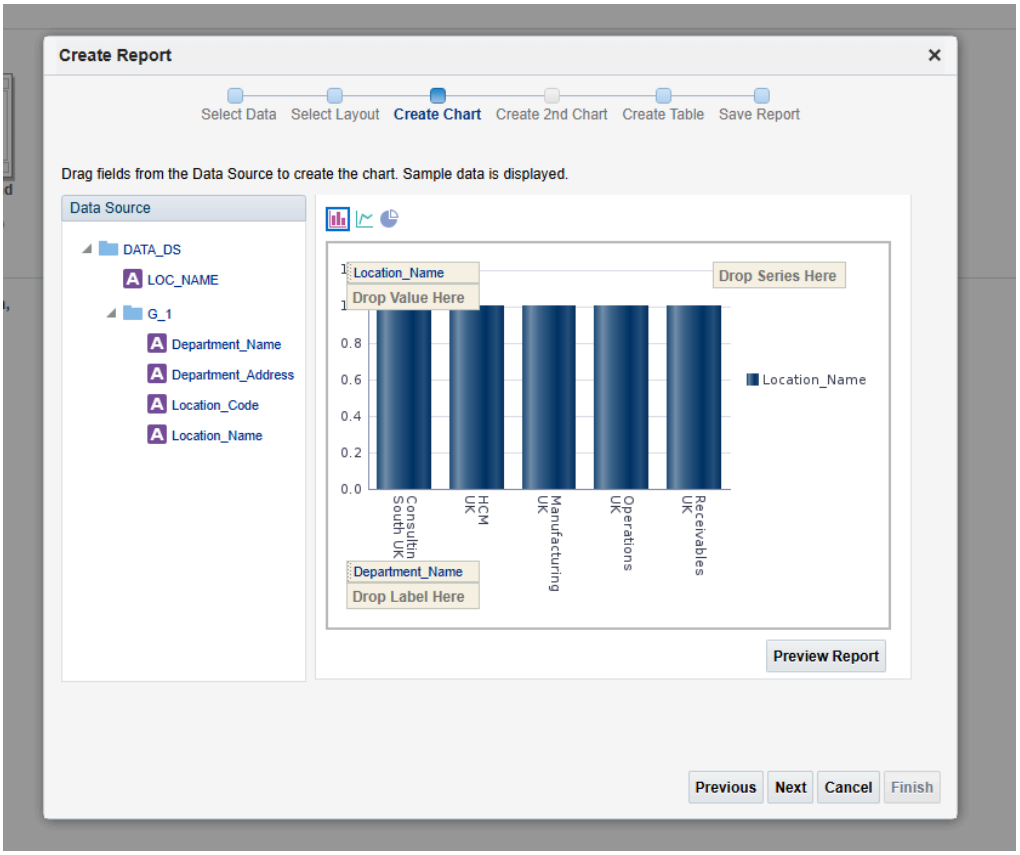

→ last step create report for this data model

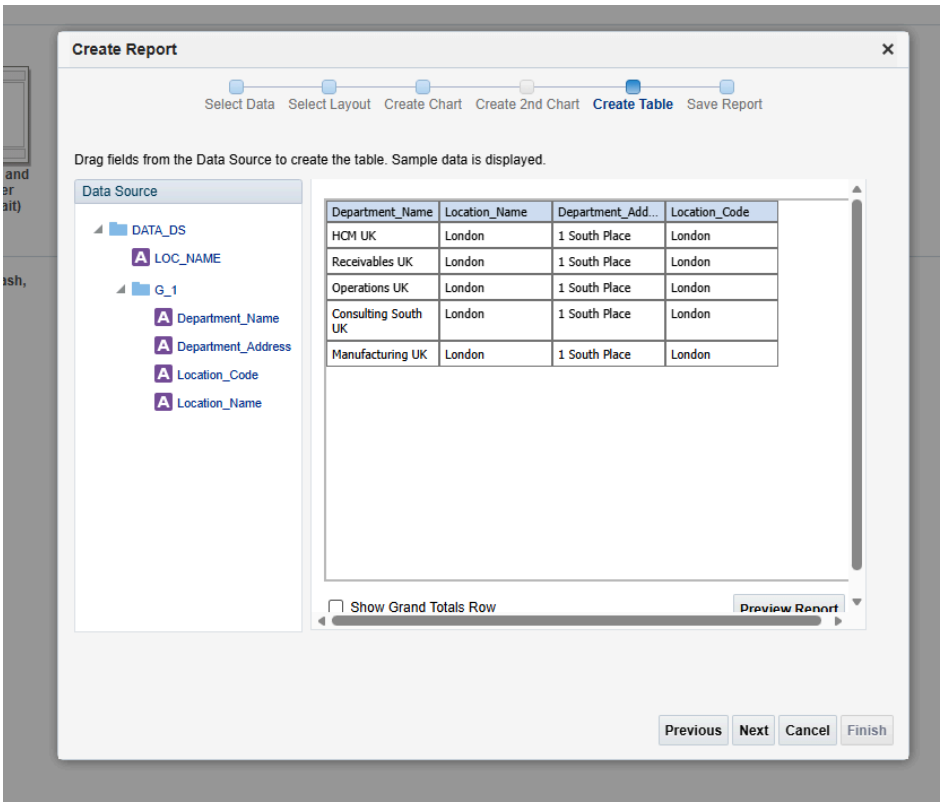

→ browse to your data model
